

Document #: SDS 006 Revision: 2 Revision Date: 8-8-2018 Page 1 of 10

ASI 502 Black

Section 1: Product and Company Identification				
American Sealants, Inc.		Emergency Phone Number		
9190 Yeager Ln		Infotrac: +1-800-535-5053 (Within US)		
Fort Wayne, Indiana 46809		Infotrac: +1-352-323-3500 (Outside US)		
Phone: 260-489-0728				
Fax: 260-489-0519				
Product Identifier:	ASI 502 Black			
Recommended Use:	Adhesive			
Restrictions on Use:	None known			

Section 2: Hazard(s) Identifie	cation	
GHS Classification:	Not a hazardous substance or mixture.	
GHS Label Elements		
Symbol(s):	None.	
Signal Word:	None.	
Hazard Statement(s):	None known.	
Precautionary Statement(s)		
Prevention:	Use only outdoors or in a well-ventilated area.	
	Avoid release to the environment.	

ection 3: Composition/Information on Ingredients				
Substance/Mixture:	Mixture			
Chemical Nature:	Silicone Elastomer			
Hazardous Ingredients				
CAS	<u>Component</u>	Percent		
7631-86-9	Silicon dioxide	5 - <10		
13463-67-7	Titanium dioxide	1 - <5		
7429-90-5	Aluminum	1 - <5		

1333-86-4

Carbon black

0.1 - <1

Section 4: First-Aid Measures				
Inhalation:	IF INHALED: Remove to fresh air.			
	Get medical attention if symptoms occur.			
Skin Contact:	IF ON SKIN: Wash with soap and water as a precaution.			
	Get medical advice/attention if symptoms occur.			
Eye Contact:	IF IN EYES: Flush eyes with water as a precaution.			
	If eye irritation develops and persists: Get medical advice/attention.			
Ingestion:	If swallowed, DO NOT induce vomiting.			
	Get immediate medical attention if symptoms occur.			
	Rinse mouth thoroughly with water.			
Most important symptoms and effects, both acute and delayed:	None known			
Protection of first-aiders:	No special precautions are necessary for first aid responders			
Notes to physician:	Treat symptomatically and supportively			

Section 5: Fire-Fighting Measures	
Suitable Extinguishing Media:	Use carbon dioxide, regular dry chemical, alcohol-resistant foam or water.
Unsuitable Extinguishing Media:	None known.
Specific Hazards Arising from the Che	emical
Exposure to combustion products	s may be a hazard to health.
Hazardous Combustion Products:	Carbon oxides, silicon oxides, formaldehyde, and metal oxides
Special Protective Equipment and	Wear self-contained breathing apparatus for firefighting if necessary
Precautions for Firefighters:	Use personal protective equipment.
Specific extinguishing methods:	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
	Use water spray to cool unopened containers.
	Remove undamaged containers from fire area if it is safe to do so.
	Evacuate area.

Section 6: Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures:	Follow safe handling advice and personal protective equipment recommendations.
Environment Precautions:	Discharge into the environment must be avoided. Prevent further leakage or spillage if safe to do so. Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.
Methods and Materials for Containment and Cleaning Up:	Soak up with inert absorbent material. For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent. Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the
	cleanup of releases. You will need to determine which regulations are applicable. Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.

Section 7: Handling and Storage	
Technical Measures:	See Engineering measures under EXPOSURE CONTROLS/PERSONAL PROTECTION section.
Local/Total ventilation:	Use only with adequate ventilation.
Advice on safe handling:	Handle in accordance with good industrial hygiene and safety practice, based on the results of the workplace exposure assessment.
	Take care to prevent spills, waste and minimize release to the environment.
Conditions for safe storage:	Keep in properly labeled containers.
	Store in accordance with the particular national regulations.
Materials to avoid:	Do not store with the following product types:
	Strong oxidizing agents

Section 8: Exposure Controls/Personal Protection				
Component Exposure Limits				
CAS	Component	Exposure Limits		
7631-86-9	Silicon dioxide	OSHA Z-3: 20 million particles/ft3 (Silica) TWA (dust); 80 mg/m3 / %SiO2 (Silica) TWA (dust)		

Product Identifier: ASI 502 Black

		NIOSH REL: 6 mg/m3 (Silica) TWA
13463-67-7	Titanium dioxide	ACGIH: 10 mg/m3 TWA
13403-07-7	Intalliulli uloxide	OSHA Z-1: 15 mg/m3 TWA (total dust)
		ACGIH: 1 mg/m3 TWA (respirable fraction)
7429-90-5	Aluminum	OSHA Z-1: 15 mg/m3 TWA (total dust); 5 mg/m3 TWA (respirable fraction) NIOSH REL: 5 mg/m3 TWA (respirable fraction); 10 mg/m3 TWA (total) ACGIH: 3 mg/m3 TWA (inhalable fraction)
1333-86-4	Carbon black	OSHA Z-1: 3.5 mg/m3 TWA
1333-00-4	Carbon black	NIOSH REL: 3.5 mg/m3 TWA
These substance	(s) are inextricably bou	nd in the product and therefore do not contribute to a dust inhalation
hazard.		
Silicon die Titanium Carbon b	dioxide	
Engineering mea	ive Equipment	 Processing may form hazardous compounds (see section 10). Ensure adequate ventilation, especially in confined areas. Minimize workplace exposure concentrations. Dust formation may be relevant in the processing of this product. In addition to substance-specific OELs, general limitations of concentrations of particulates in the air at workplaces have to be considered in workplace risk assessment. Relevant limits include: OSHA PEL for Particulates Not Otherwise Regulated of 15 mg/m3 - total dust, 5 mg/m3 - respirable fraction; and ACGIH TWA for Particles (insoluble or poorly soluble) Not Otherwise Specified of 3 mg/m3 - respirable particles, 10 mg/m3 - inhalable particles. General and local exhaust ventilation is recommended to maintain vapor exposures below recommended limits. Where concentrations are above recommended limits or are unknown, appropriate respiratory protection should be worn. Follow OSHA respirator regulations (29 CFR 1910.134) and use NIOSH/MSHA approved respirators. Protection provided by air purifying respirators against exposure to any hazardous chemical is limited. Use a positive pressure air supplied respirator if there is any potential for uncontrolled release, exposure levels are unknown, or any other circumstance where air purifying respirators may not provide adequate protection.
Hand Protection		
Remarks		Wash hands before breaks and at the end of workday.
Eye Protection		Wear the following personal protective equipment: Safety glasses
Skin and body pro		Skin should be washed after contact. Ensure that eye flushing systems and safety showers are located close to the working place. When using do not eat, drink or smoke. Wash contaminated clothing before re-use. These precautions are for room temperature handling. Use at elevated temperature or aerosol/spray applications may require added precautions.

Section 9: Physical and Chemical Properties

Physical State:	Liquid	Appearance:	Paste
Color:	In accordance with product description	Physical Form: :	Paste
Odor:	Acetic Acid	Odor Threshold:	Not available
pH:	Not applicable	Melting Point:	Not available
Boiling Point:	Not applicable	Decomposition:	Not available
Flash Point:	>100 ℃ (closed cup)	Evaporation Rate:	Not applicable
OSHA Flammability Class:	Not classified as a flammability hazard	Vapor Pressure:	Not applicable
Vapor Density (air = 1):	Not available	Density:	1.007
Specific Gravity (water = 1):	Not available	Water Solubility:	Not available
Log KOW:	Not available	Coeff. Water/Oil Dist:	Not available
кос:	Not available	Auto Ignition:	Not available
Viscosity:	Not applicable	VOC:	Not available
Volatility:	Not available	Molecular Formula:	Not available

Section 10: Stability and Reactivity			
Reactivity:	Not classified as a reactivity hazard.		
Chemical Stability:	Stable at normal temperatures and pressure.		
Possibility of Hazardous Reactions:	Use at elevated temperatures may form highly hazardous compounds. Can react with strong oxidizing agents.		
	Acetic acid is formed upon contact with water or humid air. Adequate ventilation is required.		
	When heated to temperatures above 150 °C (300 °F) in the presence of air, trace quantities of formaldehyde may be released. See OSHA formaldehyde standard, 29 CFR 1910.1048		
	Hazardous decomposition products will be formed at elevated temperatures.		
Conditions to Avoid:	None known.		
Incompatible Materials:	Oxidizing agents		
Hazardous Decomposition Products			
Thermal decomposition	Formaldehyde		

Section 11: Toxicological Information

Acute Toxicity

Not classified based on available information.

Persistence and Degradability: No information available for the product. Bioaccumulative Potential: No information available for the product.							
Mobility in Soil:		No infor	No information available for the product.				
Other adverse effects:		No infor	No information available for the product.				

Section 13: Disposal Considerations				
Disposal Methods				
Resource Conservation and Recovery Act (RCRA):	This product has been evaluated for RCRA characteristics and does not meet the criteria of hazardous waste if discarded in its purchased form.			
Waste from residues:	Dispose of in accordance with local regulations.			
Contaminated packaging:	Empty containers should be taken to an approved waste handling site for recycling or disposal. If not otherwise specified: Dispose of as unused product.			

Section 14: Transport Inf	ormation	
International Regulation		
UNRTDG:	Not regulated as a dangerous good.	
IATA-DGR:	Not regulated as a dangerous good.	
IMDG-Code:	Not regulated as a dangerous good.	
Transport in bulk according II of MARPOL 73/78 and the		
Code:	Not applicable for product as supplied.	
Domestic Regulation		
49 CFR:	Not regulated as a dangerous good.	

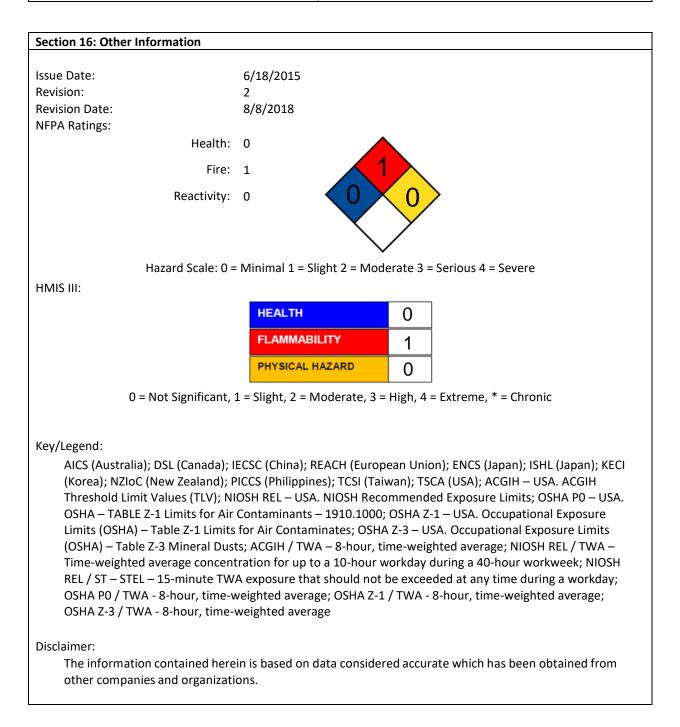

Section 15: Regulatory Information
