WCS Gutter Grabber

The WCS Gutter Grabber is a simple device designed to make the mounting of a 5" x 5" cage trap onto a gutter a quick and easy task. The bottom of this custom bracket slips right onto the edge of the gutter. When the trap is put in place the V-bend at the top rests in the mesh of the cage, clamping it securely to the gutter. It works best on traps with mesh sizes of 1" x 1" or 1" x 1/2".

For best results begin by placing the Gutter Grabber on the edge of the gutter. Though it is designed to fit snugly, it may be necessary to bend slightly in order to provide a secure fit, depending on the gutter.

Once the Gutter Grabber is secure simply slide the trap in underneath it. Again, depending on your trap it may be necessary to bend the Gutter Grabber slightly to ensure a snug fit.

The trap is now secured to the gutter without the use of tools or fasteners. It can be removed quickly and does no damage to the home.
