## Advanced Operator Training Course

Presented by:  
National Wildlife Control Association (NWCOA)

The NWCOA Certified Advanced Wildlife Control Operator Training Course has been newly revamped and is offered to train established WCOs that perform wildlife management services in or on residential and commercial properties. This is a two-day, in-depth course that looks at topics central to professional operations for wildlife control operators. It is structured as a practical, case study in a live virtual classroom style training course.

Technical course topics include:

- advanced structural inspection and exclusion
- advanced removal techniques and tools
- advanced safety
- advanced traps and equipment
- sales and customer interactions
- moles, ground squirrels, and gophers
- woodchuck, marmots, armadillos, and porcupines
- beaver, nutria, and muskrat control
- animal behavior
- commensal rodents
- venomous and non-venomous snakes and reptiles
