ONE TRAP. ONE PERSON.
ALL THE WILD PIGS.

PIG BRIG®
TRAP SYSTEMS

Pig Brig XT Trap System

The Pig Brig trap system is easy to use, simple to transport and set up, doesn't require cell service, and is truly multi-catch.

Base Net With Boar Shield: A 20-ft diameter base net with a dynamic drop strength of more than 8,000-ft-lb as well as a vinyl-coated easy pull cable seam that makes opening and closing your trap a piece of cake. The boar shield is a heavy-duty, double wall of net that keeps big boars inside.

Hardware Kit: This kit includes everything you need to set the net: 2-ft ground anchors, ground anchor driver, anchor stakes, double-hooked cam straps, T-post mounts and zip ties. T-posts are not included.

Trap Cap: A 2-ft-wide trap cap covers approximately 30% of the net opening, keeping jumpers where they belong: inside the trap.

Includes a 1-Year Limited Trap System Warranty

WCSKB-STBL $7.75

WCS™ Carpenter Bee Trap

Our Carpenter Bee Trap helps prevent damage to wooden structures by capturing carpenter bees before they can bore holes. Handmade in the USA, this trap is a chemical-free, natural solution for controlling carpenter bees. Bees enter through pre-drilled holes, descend into a large glass catch jar, and become trapped. Once one bee is caught, others are attracted to the trap.

WCSBBCBT $29.95

HY-GUARD EXCLUSION® Nest Blocker™ -

Made in the USA, Nest Blocker™ wall mount commercial exterior sprinkler head protectors are crafted from heavy-duty galvaneeled steel. They're engineered specifically to keep birds, especially Cliff Swallows (mud and barn swallows), from nesting on exterior sprinkler heads, which blocks water flow and causes corrosion. Installing the Nest Blocker™ is quick and easy, taking only minutes. Available in both a black and a white powder coat finish, the Nest Blocker™ is code compliant to keep sprinkler heads visible and unobstructed for inspection.

SKGB & SKGW Case of 4 **$78.75**

Fresh Vent - 4" Flush-Mount

When it comes to exterior vents, the details are important. That's why In-O-vate manufactures the FreshVent in the USA using a precision deep-drawn process with premium 22-gauge Galvalume® steel. The result is a product that not only looks beautiful on day one but maintains its appearance for years to come thanks also to a polished finish of Premium Polyester TGIC Powder Coating.

WCS™ Chatterbox
Audible Raccoon Deterrent Device

The Chatterbox is an auditory deterrent system that increases the efficacy of WCS raccoon eviction products. The main predator of juvenile raccoons are adult males. When a female senses the presence of a male, she will often relocate her litter to a safer location. Use the WCS™ Chatterbox to mimic a males presence to encourages female to move the young without the need for trapping or extraction. Recordings of aggressive male raccoon vocalizations, with accompanying green LED flashing lights create a multi-sensory deterrence that increases the efficacy of raccoon evictions. While eviction products are not guaranteed to work in all cases, they are significantly more successful when paired with another sensory deterrent. A separate recording of juvenile raccoon chatters is also included. These juvenile raccoon vocalizations are great when trying to trap a female with young or any other nuisance raccoon. The Chatterbox is rechargeable to allow multiple uses for either eviction or trapping.

WAUDRAC $22.50

Trapper's Grip Body Grip Setter

The Trappers Grip was designed to enable a safe, quick and easy method of compressing heavy body grip trap springs, eliminating the need for the immense upper body and arm/hand grip strength required to compress these springs with previous compression methods. It is designed for use with common corded/cordless drills, or in the event a drill is not available, the threaded shaft can also be rotated by hand, using the drive-end knurled knob to open or close the links.

WTGRIP $89.50

Raptor Edge Magnetic Bait Station

Back by popular demand! The Raptor Edge Bait Station is an adaptable and multi-functional bait station. It features bait pegs for rodenticide and can hold a Big Snap-E rat trap when capture is the goal. Integral trap brackets will firmly hold other similar sized rat/chipmunk snap traps. The unique magnetized system allows you to attach the bait station directly to walls, the underside of dumpsters, food service equipment or metal doors. Now your bait station doesn't have to be left sitting on the ground. It can be placed discreetly and or in high traffic areas. Whatever the application, the Raptor Edge is capable of "sticking to the task".

WCSRAPEDGE Single **$24.95**

TKG Snap Rat Trap

High-trigger sensitivity and interlocking teeth make for a quick, humane kill with almost no possibility of escape. A removable bait cup unscrews from the bottom for easy and clean baiting.

Additionally, they can be placed inside the Protecta Rat bait stations, or on the SB357 Magnetic Trap Base. Good for rat, chipmunk and Weasel.

WTKGSRT Single **$4.75**

SNAKE GUARD® Snake Trap

Humane and effective snake removal!

A live capture, single use trap with a "no-touch" removal method. Humane, effective and simple to use, this water resistant cardboard trap uses super-sticky glue strips that match the angle of "push off" used by a snake when crawling. Successfully used to capture venomous and non-venomous snakes. To release, transport to a remote location, pour a liberal amount of vegetable oil on the glue (watch to not submerse snake's head in oil) and the snake should work itself free in under an hour.

NOMOL®

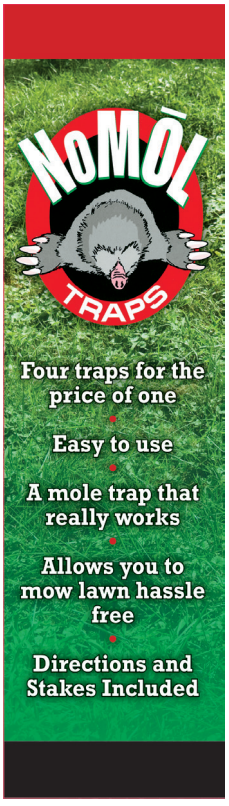

The safest and most effective trap on the market!

With a completely below ground profile, our lightweight NOMOL® traps are the professional's choice for inexpensive mole management. Easily set in pairs, back-to-back, these in-tunnel traps are great for bilateral catches of moles, voles and shrews. Excellent for deep tunnels as well as sandy and heavy soil. Rust Resistant Coating prolongs the life of your NOMOL®S.

NOMOL 4 pack A starter pack that introduces you to the NOMOL® trap. Comes with 4 traps, 4 dowels and detailed instructions on how to set.

Larger Dozen and 5-Dozen Magnum packs available.

WCS Vet-Pro™ Warden 22" Gloves

Quality construction for long lasting protection!

Visit page 101 to learn more about Vet-Pro™ gloves

All Vet-Pro gloves (except the Forester) are made of hand-cut, split grade cow-hide palomino leather and a ballistic lining of DuPont Kevlar felt. Unlike knitted or woven versions, Kevlar felt is tightly packed for maximum puncture resistance. Double-stitched with Kevlar thread, with a loose fit for dexterity and emergency removal. The Forester glove's palm is lined with Kevlar and the cuff is double thick palomino leather. A favorite of vets, humane societies, animal wardens, breeding farms, university labs and reptile handlers.

WCS™ Tube Bait Kits *The easiest way to apply paste bait!* See pages 38, 50, 102

WCS introduces another time saving idea with its popular paste baits. An easy to apply, no-mess Tube that can be used with the bait gun or just applied with a plunger. Also available in Single Tubes with plunger. Bait has never been so easy to apply! Includes a Paste Bait Gun and three Tubes. Tube Bait, like all of the "Premium Grade" bait products, is spiked with an anti-drying agent to increase the bait's effectiveness.

WCS™ N.B. Tube Bait

N.B. is a rich mix of nut oils, meats & seeds that rodents find irresistible and it has been a "go to" bait for professionals to attract mice, rats, chipmunk, gray squirrels, red squirrels and flyers since 1999.

WCS™ Treeberry Tube Bait

Great on raccoon, skunk, even armadillo this sweet smelling paste bait fills the air with its aromatic scent and is a combination of tree-ripened fruit essence puree along with an undertone of bush berries. Place on your favorite bait holder (marshmallow or cracker) and position so animal must pass over the pan to reach it.

WCS™ Acorn Paste

For mice, squirrels, chipmunks. A rich mix of Pure Acorn Essence oil and pulverized white oak acorns that squirrels simply find irresistible. This bait, like all "Premium Grade" bait products, is spiked with an anti-drying agent to increase the bait's effectiveness.

WCS™ Mouse Magnet Bait

Our newest paste bait is specifically formulated for all varieties of mice and similar rodents, such as shrews and voles. With a proprietary mixture of aromatic nut oils and other ingredients, Mouse Magnet will draw the rodents to your traps quickly. Includes an anti-drying agent to increase effectiveness and durability. Excellent results with rats and chipmunks too! Three 1 ounce tube applicators and one plunger.

Uncle Kirk's "Gold Magic" Gel

Uncle Kirk's Gold Magic Rodent Lure (Gel) with the new Paste Bait Gun (WCS101504). This gel consistency lure was 20 years in the making. Long lasting and very attractive to a variety of rodents including mice, rats, and squirrels of all types.

Fearless Tube Bait

WCS™ Fearless Rat and Mouse Bait, is a proprietary blend of nut oils and meats (No Peanuts), seeds, and a special ingredient scientifically proven to reduce neophobic behavior in rodents. Excellent results with squirrels and chipmunks as well.

See page 104

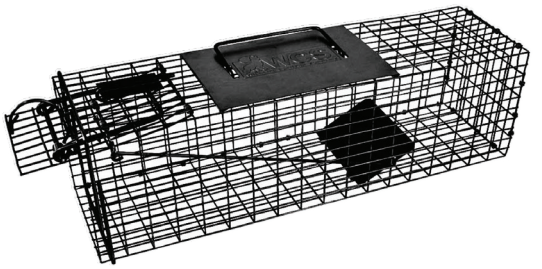

WCS™ Special Squirrel Trap

Newly improved with blacktone plating to help camouflage your trap and resists rusting!

We call these "Special Squirrel" Traps because:

- ***They are specially made for WCS to our exact specifications and are not available anywhere else.***
- ***Wildlife control professionals say so! They have construction and features professionals need in a squirrel-sized commercial-grade trap.***

WCS created this easy-to-set squirrel trap to stand up to years of service. Trap measures 5"W x 5"H x 18"L, dimensions precisely suited for squirrels. It is offered it in two styles: Standard with 1" x ½" mesh for general use and Professional with ½" x ½" mesh for daily use and to prevent bait access from the outside of the trap. Both traps include an effective door lock to allow for one hand setting (great for use with ladders). And we added a handguard plate for protection when moving your capture. The result is a custom-designed trap that is second-to-none. A WCS exclusive!

WCS™ Special PRO-24, Special PRO-30 and PRO-30 with Rear Release

Visit page 123 to learn more

The WCS™ Special PRO Cage Traps were designed by WCS for professionals, meeting our exact specifications. Not available anywhere else, these traps are a special value and have features professionals are looking for in a commercial-grade trap.

Lower portion and back is constructed of 1/2" x 1", 13.5 gauge mesh which makes for a very durable trap and prevents animals from pulling up dirt and debris into the trap.

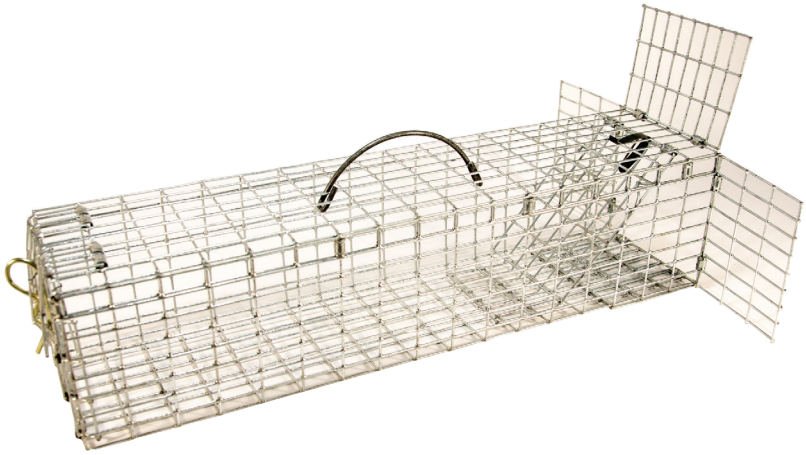

Our Special Cage Traps are able to stand up to the rigors of day-to-day use by professionals. They have a simplified locking mechanism and finger grip, allowing you to set the trap or open the door release with one hand. Pan has a beveled back for added strength and is protected by lift guards on either side.

Dimensions: PRO-30 is 30"L x 11"W x 12"H and is available with or without a sliding rear door.

The PRO-24 is 24"L x 7"W x 8"H and comes with a sliding rear door.

WCS™ Excluder Series

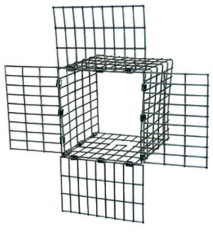

Our new 4" Excluder Series provides great flexibility for excluding squirrels and similar size animals.

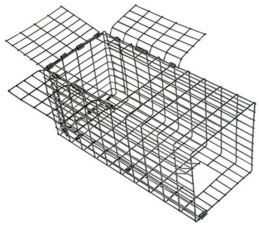

The trap has a one-way door, mounting flanges and a hinged back door which can be left open to let the animal out or closed if you wish to relocate the trapped animal. Constructed of 1" x ½" Galvanized Wire and includes a handle. When used with the nose cones listed below, the mounting flanges are not used.

Two different type nose cones areavailable. Secure nose cone over entrance hole of animal. Once an animal is caught, you can replace the trap, leaving the nose cone secured. When all animals have been caught remove nose cone and repair hole.

Visit page 122 for WCS Excluder Series

Straight Nose Cone
Secures trap perpendicular to structure.

Wall/Soffit Nose Cone
Secures trap against or under a surface.

See page 135

WCS™ Easy Set Tube Trap

With a new patented setting system, the WCS™ Easy Set Tube Trap is extremely easy to set and very effective! Constructed of 21-gauge steel, this tunnel shaped trap is 4.5 inches in diameter, 15 inches long, and is powered by a beefy double torsion spring. Used either baited or non-baited, the tunnel trap is a natural attractant to squirrels and other rodents wanting to run through it or hide in it. Once the squirrel reaches the triggering pan in the middle of the trap, and steps on it, the double torsion spring triggers the strike bar. When a capture is made, the squirrel is generally hidden from public view. There is a built in safety latch which prevents the trap from prematurely firing while setting.

WTUNNEL01 $49.95

The "Rust Resistant" WCS™ Tube Trap

WCS is pleased to offer the ARMOR-COATED Tube Trap.This trap is treated with an electro-plating process turning it olive drab in color and highly rust resistant. No need to dip, dye, or spray paint these traps. Just pull them out of the box and use them. They last for years.

The "Shorty" WCS™ Tube Trap

- Zero Clearance strike
- Plated to minimize rust
- Fits in small spaces
- Mechanism in use 30+ years

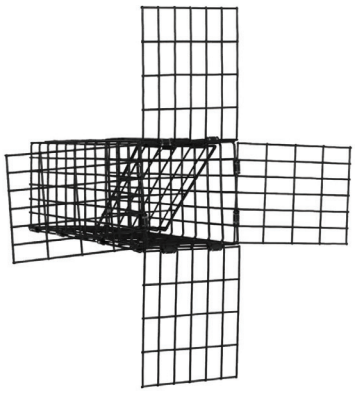

WCS™ Tube Trap Cap

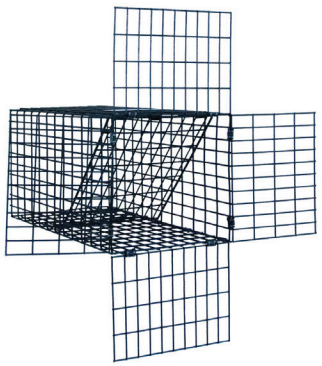

The WCS Tube Trap Cap is just the tool for increasing the versatility of our popular Tube Trap. Available in two styles – with or without an access hole. Choose Model A to reduce the opening on the Tube Trap, or Model B to close off one end all together. It mounts easily just by sliding onto the end of the trap. Additionally, with its feet, the Tube Trap Cap serves as a stabilizer with mounting holes allowing you to easily mount on a variety of surfaces.

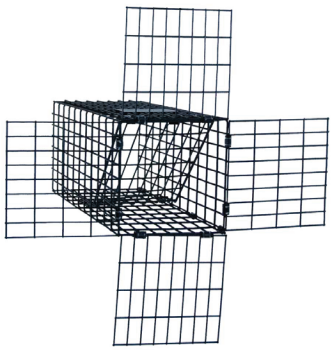

WCS™ "OWDE" One-way Door Excluders

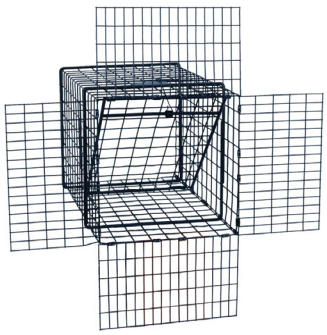

WCSEX3

WCSEX5

WCSEX4

WCSEX8

Newly improved with black tone plating to help camouflage your trap when installed and resists rusting!

WCS™ One-way Door Excluders allow unwanted guests to be humanely and effectively removed from structures. These units are designed to let animals leave but not return. Excluders have 4 mounting wings which allow them to be attached directly over the animal's den opening. The spring loaded one way door lets animals exit and prevents them from returning. Available in three sizes each made with 1" x ½" galvanized wire mesh).

See page 122 to learn more

WCS™ Avian-Spinner

This Woodpecker/Bird Deterrent is wind operated and it is best hung from the outside corner of buildings. At this location it can receive wind from 270 degrees, as well as increasing visibility to the woodpecker. If trees are present at these locations, move the flasher to a point that receives not only wind but is visible from the area that is receiving woodpecker damage. It is usually not necessary to put it directly at the point of activity, however try to keep it within 20 feet of the damage area. Comes complete with a wire arm for mount. Available in two sizes, standard and with Eye.

See page 28 for more info

WCS™ Large Pigeon Trap

Just call it the Pigeon Hilton. Our extra-large trap holds 45-60 birds at a single setting and comes in 7 convenient panels. Extra panel can be used as a separator when removing birds. 8 non-stick bobbin-type doors (4 each end), plus 1 large cleanout door. 14 gauge wire, 1" x 2" mesh. 4'L x 3'W x 2'H. Includes (1) Shade Cloth.

Visit page 14 for more info

WCS Tip – place on flat roof or plywood and bait with whole corn to avoid attracting smaller birds

Shade Cloth for WCS™ Large Pigeon Trap

Shade Cloth for WCS™ Large Pigeon Trap – This fabric is extremely strong and durable, treated to withstand the sun's rays, yet lightweight enough to allow water to pass through. It measures 2' x 3' and includes 4 grommets.

The Coontroller™

See page 123 for more info

An industrial strength exclusion device designed to allow raccoons to leave a structure but not allow them to return through the original access point. Appropriate for use when raccoons are in an attic, chimney or underneath an enclosed shed or deck. The excluder features a unique cam locking double door that allows wildlife to push through to gain access to the outside, but locks behind them so if they try to re-enter, they are stopped cold. The Coontroller is 17" x 8" x 8" and is constructed of 1" x 1" galvanized 14 gauge wire mesh. Also effective for groundhogs, skunks, feral cats, armadillo and other similar sized animals. Note: This is not a trap; it allows animal to leave but not re-enter.

When you have a need for a custom solution, we're here to help!

Intimidator Visual Bird Deterrent

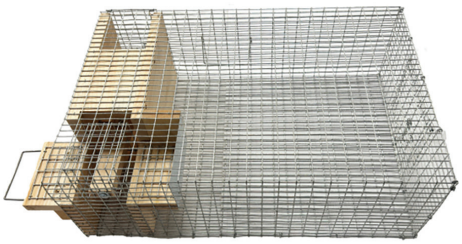

The Intimidator is a professional grade visual bird deterrent that uses motion and bright flashing to scare away woodpeckers and other birds from unwanted areas. Woodpeckers can cause serious damage to homes and other buildings. The Intimidator is lightweight and needs very little air current to create a dynamic visual effect that frightens birds. It mounts easily to any wood surface with a single screw. Units must be mounted to reflect flashes onto the side of the structure.

WCS™ Repeating Elevator Sparrow Trap

The new WCS™ Repeating Sparrow Trap has arrived! This elevator style repeating sparrow trap is very effective and has been field tested and vetted by professionals. This trap resets automatically catching multiple birds every day. The large capacity of this trap will hold up to 40 birds and allows for native non-target captures to be released unharmed. The trap works the best being placed on a slightly elevated picnic table or deck railing. It is imperative that the trap be monitored at least once daily so that any species can be immediately released!

PRODUCT FEATURES

- Holds up to 40 birds
- Very effective and field tested

WCSSPSW $84.95

WCS™ Multi-Catch Chipmunk/ Ground Squirrel Trap

The new WCS™ Multi Catch Chipmunk Trap has two entry points with closeable wire doors that can cover the entry points for safe, secure transport after the catch. Lead the chipmunks into the trap by placing bait in the two entrances to the trap, as well as inside the trap. Also very effective for red squirrels, flying squirrels and similar sized animals!

PRODUCT FEATURES

- 14" x 14" x 3"
- 1" x .5" mesh

Two carrying handles on the top of the trap

Gepaval Cannons

Gepaval Guardian-2 Standard Propane Cannon w/Telescoping Barrel

The GUARDIAN-2 Standard operates on butane or propane gas allowing it to make sound detonations for the protection of crops by scaring off birds, wild boars, deer and other animals that could damage them. The detonations can be regulated to fire from every minute to every 30 minutes, and the sound intensity can be adjusted with its telescopic cannon barrel, ranging from 80 to 120 decibels. The area of protection is between 7 to 10 acres, depending on the type of crop, topography, and weather conditions.

The machine activates with a piezo-electric system, while the rest of the cannon is mechanical to ensure high reliability and minimize damage or potential problems. The whole machine is fully galvanized to withstand the weather.

Gepaval has a long history of reliability, efficiency, and manufacturing expertise, and we are happy to bring these products to the U.S. market for the first time.

NOTE: This unit comes with a telescopic barrel to vary sound intensity. (Propane cylinder not included)

WCSGPSTD $289.95

Gepaval Guardian-2 Single Rotary Propane Cannon

The Guardian-2 Rotary Propane Cannon sits on an included tripod, and rotates approximately 90° with each blast. An additional benefit of the tripod is that it raises the cannon 5 feet above the ground resulting in better sound propagation and increased protection area.

NOTE: This cannon comes with a non-telescopic, fixed barrel resulting in a consistent 120 decibel blasts. Product does not come with a propane cylinder.

WCS PRO-12 Bear Foot Snare

The PRO-12 has become the standard among bear trappers, either for nuisance or sport trapping. The pan has been "right sized" in response to bear trappers feedback and is fully tension adjustable. A 12" launcher with specially shaped jaws, holds and propels the spring enhanced cable onto the bears paw. Jaws can be easily replaced. The 3/16" 7 x 19 cable has a custom stainless Tripp lock and a 40" compression spring running the length of the cable. The spring eliminates the need for movement of the bear to close the cable loop. Each cable comes with a heavy-duty stainless swivel.

WCS Bear Foot Snare (Aldrich Style)

Due to popular demand, this Aldrich type bear foot snare is back in production. Used extensively by the USDA-WS and state wildlife agency personnel, the improved Aldrich now has a safety latch to prevent premature triggering. When properly set, non-target animals can be released and captured bears can be tranquilized, released or relocated. Made exclusively in the U.S.A. for WCS.

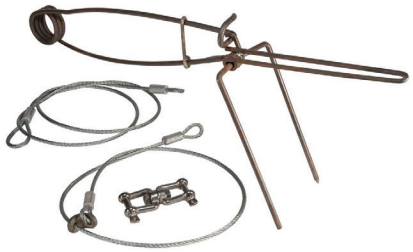

WCSABS $60.50

M15 Bear Foot Snare

Versatile, easy to bait and incredibly effective! To set, mount the M15 to a 5-gallon bucket (not included) with the spring-activated cable loop nestled inside the bucket lid. A bear reaching into the bucket to pull on the bait hook is immediately snared by the paw. The deer proof M15 comes with complete instructions, M15 Thrower, Snare cable loop, Heavy Duty Cable Anchor, and a Stainless Steel #8 Swivel.

Bats Out of the belfry, the attic and the chimney!

Batcone® Products

Durable Batcones are a humane, one-way exclusion device for ridding any building of unwanted bat colonies – forever. Since they cannot grip the slippery inside of the Batcone, bats have no way to crawl back in. Set these Batcones with a slight downward slope to make it easier for bats to exit. Once excluded, seal the exit points with mesh and Todol Foam or Solar Seal.

Batcone® II – Bat Excluder

For fast, easy installation, this model can't be beat. The reusable, long lasting cone attaches quickly with pushpins, nails, staples or even duct tape. Polyethylene excluder is 6" long and comes with four flexible tabs at one end to attach over entry/exit point.

WCSDV8-32 $120.95

B3X-SR Exclusion Strips

B3X-SR Exclusion Strips are specifically designed for use with corrugated metal roofs and exclusively sold by WCS. They provide the same great protection from Bats, Birds & Bees as the original B3X strips, but their wedge shape makes them ideal for excluding the spaces created by corrugated metal roofing. The "compression anchor technology" constructed of reticulated polyurethane material allows installation without adhesives or tools. Each box contains 24 two-foot strips, for a total of 48 linear feet.

Professionals agree that there are never too many options when doing wildlife exclusion work. Now, when dealing with corrugated metal roofs, you have another great one in your toolbox. Just stuff B3X-SR Exclusion Strips into the roof openings to keep those nuisance pests out!

B3X-SR-24 $141.50

Bats – General Information

Bats provide an important environmental role by controlling many harmful insect species. Due to White-Nose Syndrome and human activities many bat populations are in decline worldwide. Very few species of bats inhabit buildings but when they do control is often necessary. It is important that bat exclusion is not conducted from April-August as the juvenile bats are not yet able to fly. Sometimes a bat found inside a home is not due to an infestation, but merely entered through a window screen, open door, or uncapped chimney. Bats are often attracted near homes to the insects drawn to white lights. Replace outdoor lights with yellow or orange for less flying insects.

Common Bat Entry Points

Some of the more common entry points for bats include openings at the roof edge, soffit and facia areas, gable, roof or chimney vents, dormers and gaps in the siding. (See Figure 1)

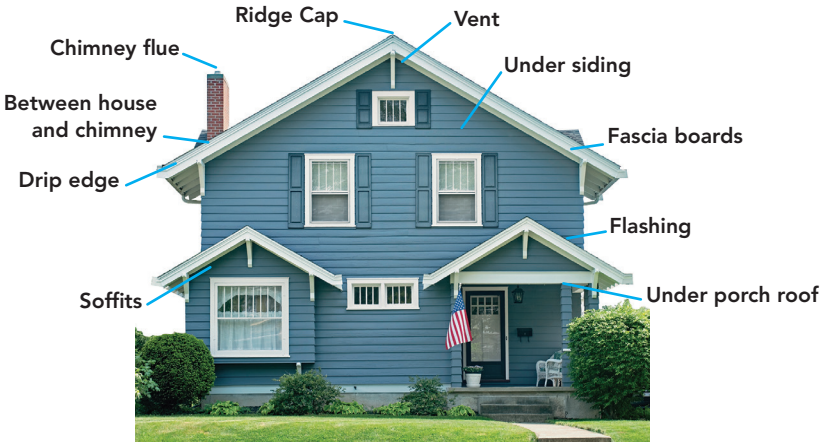

Figure 1

Other potential entry points include window frames, gaps around utility entry, and gaps under doors. Bats can squeeze through very small openings. Look for guano on the structure, urine stains, and grease marks (sebum) to find active entry points. Bat entry points are defined as areas that are greater than or equal to 5/8-inch round or ¾ inch long regardless of orientation. Once bats become established in a structure, they can be difficult to remove. Bats will return to the same roost site every year, so it is common for the colony to grow in numbers. Proper exclusion techniques utilizing one-way valves is the most effective way to solve bat/human conflicts.

Health Risks

Although bats are a valuable economic and environmental resource there are health concerns when there is human contact with a bat or with accumulations of guano. Human contact with a bat or its saliva requires rabies vaccines. Accumulations of bat guano can result in exposure to Histoplasmosis spores (a fungal infection of the lungs and eyes) and other zoonotic diseases. The use of proper personal protection equipment like bite gloves and NIOSH approved HEPA respirators will reduce these risks.

Tips for Bird Control Using Lasers

Many bird control programs and issues can be greatly improved with the use of the proper lasers. There is a big difference in using professional equipment and procedures versus ordering lasers off the internet and using them haphazardly on birds. Using lasers to direct birds toward a mist net or out of dark corners can greatly speed up removal in large open buildings. Using a laser to harass resting waterfowl and roosting Corvids (birds related to crows such as ravens and jays) can be very successful. Lasers below 30mW will be most effective in very low light conditions and interior applications. Lasers 50mW and stronger will work best within a few hours of sunset and sundown, on very overcast days, and in all other low light conditions. Laser with a power ouput of 100mW or higher will be effective in daylight conditions. WCS offers multiple lasers for different applications.

Pro Tips:

- Short bursts are more effective than a continuous beam
- The wider the beam the better
- Use zig zag motions
- Repeatedly treat roost sites at dawn and dusk
- Never point lasers at a person's head, aircraft, or vehicles
- Always follow all laws and regulations including OSHA

AVIX Handheld Lasers

The AVIX Handheld lasers are highly effective tools for direct intervention to keep birds away. Birds perceive the laser spot as physical danger. Once they perceive the laser spot, they fly away in search of safer ground and, in contrast to conventional methods of bird deterrence, there will be no habituation. After consistent use of the Handheld, birds will perceive the controlled area as unsafe and will not return. It simply works! Available in two models. To ensure you are getting the right options for your needs, please call and consult with one of our bird control specialists.

AVIX Autonomic Laser Bird Repelling System

The AVIX Autonomic Mark II is a state-of-the-art fully automated bird repelling system, providing continuous bird repelling capability after a one-time configuration. The principle of repelling birds with a laser beam is inspired by nature. Birds perceive the approaching laser beam as a physical danger. It appeals to the survival instinct, causing the birds to fly away. The continuous presence of the moving laser beam keeps areas free of birds, 24 hours a day, 7 days a week. The laser bird repellent has proven to be effective over time without habituation.

Fly Away™ 30mWatt Laser (Green)

You have probably known for some time that lasers are highly effective tools to solve bird problems. The remaining problem was – lasers that were powerful enough to do the job cost too much. Introducing the Fly Away™ laser, a powerful, low cost, high quality laser proven effective with extensive field use.

BDL-1 $507.50

Fly Away™ 50mWatt Laser (Green)

To be effective, lasers must have contrast between the light from the laser and ambient light. The greater the contrast, the more effective the laser is, especially if you are dealing with 100 birds or more. This laser is designed to provide more flexibility in how you work and when you work. The BDL-50G Fly Away™ laser is a powerful, low cost, high quality laser proven effective in brighter areas.

BDL-50G $712.50

Bird-X Lasers

Bird-X has two versions for laser bird control; an indoor model and an outdoor model. They use laser technology at random intervals in red and green color combinations birds hate, forcing them to find calmer landing areas. Works day and night (daytime in darker areas, though many choose to only use at night) with constantly changing patterns, which prevents birds from acclimating to the laser.

Bird-X Indoor Laser NWSBX-LASER-IN **$489.95**
Bird-X Outdoor Laser NWSBX-LASER-OUT **$351.75**

EXCLUSION (or physical deterrents)

Bird Barrier Bird Slide

When total exclusion for ledges, eaves, angle irons, I-Beams and most "L" shaped ledges is the goal. As many bird control experts know, there are ledges where heavy pressure (nesting birds) demands an exclusion system, and netting may be visually unacceptable. BirdSlide completely protects the ledge against all bird species; they simply can't get a grip and "slide" right off the ledge. BirdSlide comes in Beige and Grey, but can be painted to match any color to blend into the structure.

For ledges 6", the flat base simply glues or can be screwed to a clean surface. For narrow ledges, the "fin" can be trimmed down; for wider ledges an extension can be added.

Bird Barrier Bird-Flite

Narrow – 2 ½", Wide - 4 ½", X-Wide 8"

Bird-Flite is installed on thousands of U.S. buildings with an incredible success rate, even under heavy bird pressure. Its thin, stainless steel rods and U.V.-resistant polycarbonate base are extremely durable and it is also the least conspicuous spike product on the market. Unlike similar products, Bird-Flite's spikes are blunted, preventing injury to birds or unsuspecting workmen. Bird-Flite's wires are spaced 1.5 inches on center-far enough apart to repel pigeons, yet avoid entrapping debris. The base can be glued or screwed in place. Available in one foot lengths, each section can be broken into smaller sections to accommodate any architectural configuration.

(100 Rounds)

*NOTE: Purchase of Bird Bangers & Screamer Sirens require a completed Wildlife Control Statement. A blank ATF form is available online or by calling WCS.

HAZARDOUS MATERIAL: All pyrotechnic products are considered Hazardous Material. A separate HAZMAT fee imposed by Shipper is passed along in shipping charges. Items can only be sent via ground methods only. No expedited shipping allowed.

CANNONS

Inexpensive to operate, low maintenance and undeniably loud. A propane cannon is best suited to agricultural and other wide open spaces where flocking birds congregate. The loud report scares them away.

M4 shown with optional Rotomat Platform. Propane tank not included.

M3 Single Bang Propane Cannon
Produces single bangs using flint ignition. Each flint provides up to 1,000 ignitions.
WCSRJM3 $348.50

M4 Single Bang Propane Cannon
Produces single bangs that can be regulated from one bang every thirty seconds to one bang every twenty minutes. The piezo ignition system operates without batteries or electricity and produces up to 200,000 ignitions.
WCSRJM4 $399.75

Roto Mat Revolving Platform
Enables the Scare-Away Propane Cannon to change direction each time it fires, extending the effectiveness of the cannon in all directions. Shown above with M4 canon mounted.
WCSRJRM $337.25

M8 Multi-Bang Propane Cannon
Produces six bangs within 90 seconds. Three bangs are fired in the first 30 seconds and three additional bangs are fired at irregular intervals. Frequency of six-shot series may be adjusted from one series every 45 seconds to one every 20 minutes.
WCSRJM8 $466.50

Clock Timer
Battery-operated, this timer activates and deactivates the Scare-Away LP Gas Cannon automatically, with no winding necessary. Operates for an entire season on just one AA battery.
WCSPO125 $123.50

Gepaval Guardian-2 Standard Propane Cannon w/Telescoping Barrel
This unit is identical to the ECO Propane Cannon listed above, with an added feature of a telescoping barrel to vary sound intensity from 80 to 100 decibels. Note: Product does not come with a propane cylinder.
WCSGPSTD $307.50

Gepaval Guardian-2 Single Rotary Propane Cannon
The Guardian-2 Rotary Propane Cannon sits on an included tripod, and rotates approximately 90° with each blast. An additional benefit of the tripod is that it raises the cannon 5 feet above the ground resulting in better sound propagation and increased protection area.

Note: This cannon comes with a non-telescopic, fixed barrel resulting in a consistent 120 decibel blasts. Product does not come with a propane cylinder.
WCSGPSROT $409.95

Gepaval Automatic Timer for Propane Cannons
A Gepaval Automatic Timer is the ideal accessory for all GUARDIAN-2 models. The clock-timer can be used to start and stop the cannon system automatically at the desired times (one "on" and one "off" per 24-hour period). It is completely waterproof, and battery operated, ensuring minimum power consumption.
WCSGPTIM $120.95

Thunder "Banger" Boom Stick
The Thunder "Banger" Boom Stick is proven safe, portable, and cost effective. Providing a loud shotgun sound, it efficiently moves nuisance birds from exterior areas. Extremely cost effective and great for dispersing large flocks of Grackles, Starlings, Crows, and Geese! The unit is charged with a standard MAP-Pro gas canister (Not Included). (26" long x 4" diameter)
TE-T100 $460.25

Answer for the Control of Pocket Gophers (Lethal)

J.T. Eaton ANSWER for the Control of Pocket Gophers comes in a 10lb pail containing (40) 4oz blocks. This bait provides long-term control with a single application. ANSWER uses the active ingredient Diphacinone, and is less hazardous than other gopher baits containing strychnine or zinc phosphide. (Not for sale in Eastern US.) (EPA REG 56-57)

WCS277 $40.95

Kaput-D Pocket Gopher Bait (Lethal)

Kaput-D Pocket Gopher Bait is a red grain containing the active ingredient Diphacinone. It effectively kills gophers on lawns, golf courses, rangeland, and other non-crop areas. It can easily be applied with the Gopher Pro tool and usually kills within one week. Unlike products containing strychnine or zinc phosphide, Kaput-D has an antidote as well.
(EPA REG 72500-12)

Pocket Gophers

A fossorial animal named for its fur lined cheeks. There are 13 species found in the U.S with the most widespread being the Plains Pocket Gopher. Pocket Gophers are specially adapted for their burrowing lifestyles, including small eyes and ears, and clawed front paws. They are medium sized rodents that range from 5-14 inches in length. Loose sandy soil with edible cover is their preferred habitat. They prefer stems and roots of plants, with seedlings often targeted. Tunnel systems usually end with a mound of dirt that is plugged. Burrow systems may be more than 200 yards long with new mounds averaging 1-3 per day.

Trapping, Fumigants, and Rodenticide

Several types of gopher traps are very effective including the Gophinator, Macabee, Death Klutch, and the Gopher Hawk. If you do not catch a gopher within a few days relocate it to a new location. You can leave traps exposed or covered but be sure to stake them down. Using the Burrow Rx (a carbon monoxide delivery system) has proven effective, eliminating populations quickly reducing trips to a site. When using toxicants proper bait placement is key. Always place toxicants in the main tunnel. After locating the main tunnel using a probe, enlarge the opening and carefully place the baits in the run using a spoon or funnel to prevent spillage. Always follow the instructions on the label.

Magnum "Gophinator" Lethal Gopher Trap

The Magnum Gophinator Gopher Trap, larger and stronger that the original Gophinator trap, eliminates the problem of trap shyness in a number of ways. It employs a powerful torsional type of mechanism which draws the gopher into a pivot point at the front of the trap and applies more than enough power to hold and kill even the largest adults quickly and consistently. The theory here is that if the gopher is killed on its first encounter with a gopher trap, it never gets the opportunity to learn to avoid traps.

WCS™ Wooden Rabbit Trap

The WCS™ Wooden Rabbit Trap is the preferred rabbit trap, specifically designed for capturing rabbits that refuse to go into a wire cage. The simple design was "borrowed" from the Pennsylvania Game Commission, who published a document on capturing cottontail rabbits. Anyone who has tried to get a rabbit to go into a wire cage knows that it isn't that easy. Rabbits appear to be more comfortable entering a wooden box. This trap also works for Woodchucks, Armadillos, and Skunks.

Note: Trap comes with a 1 oz. bottle of WCS Apple Essence. If using for skunk, please call, as we will substitute a 4 oz. jar of WCS Bait for the Apple Essence.

WCSWRT $61.50

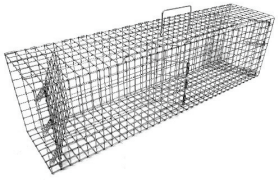

WCS™ Wooden Rabbit Trap - Double Door

How do you improve on a single door wooden rabbit trap? Give it a second door! The Double Door WCS™ Wooden Rabbit Trap lets the rabbit see all the way through the trap so it feels more comfortable going after the bait. WCS™ Wooden Rabbit Traps are the preferred rabbit traps for professionals, specifically designed for capturing rabbits that refuse to go into a wire cage. Their simple design was "borrowed" from the Pennsylvania Game Commission, who published a document on capturing cottontail rabbits. Anyone who has tried to get a rabbit to go into a wire cage knows that it isn't that easy. Rabbits appear to be more comfortable entering a wooden box. No. 8 Skunk-N-More 8" Trap w/Release Door

Ztraps No. 8 Skunk-N-More 8" Animal Tube Trap - Constructed of one piece PVC tubing that is 5/16 inch thick, this trap is indestructible and will last for many, many years. The Nuisance Animal Tube Trap is stronger than any standard nuisance animal cage trap on the market today.

ZT8-SD $131.25

Spray Proof Skunk Trap

The Spray Proof Skunk Trap is constructed of round 6" PVC pipe (green), which means that when a capture is made the skunk is fully enclosed and out of view. The trap has a gravity-activated door which is very easy to set. This trap is very unique as it doesn't look like a "square cage trap" to a trap-shy animal. Will last for years.

NWSTT6 $80.50

No. 6 Skunk-N-More Trap 6" Trap

Ztraps "Spray Proof" 6" Skunk Trap is an effective & humane method for capture and release of nuisance skunks. The 6" PVC tube limits the skunk's ability to lift its tail. "If the skunk cannot lift its tail, it cannot spray". The enclosed confines of the tube keeps the animal calm and prevents the trapper from being scratched, bitten or sprayed. Effective for catching skunks, opossum, cats, rabbits and other similar sized animals.

Cottontail Cager Rabbit Lure by Bob Noonan

Cottontail Cager™ contains a heavy, pungent dose of mature male cottontail rabbit glands, mixed with male rabbit urine and a curiosity ingredient. Cottontail rabbits are extremely territorial, and will fight viciously to defend their turf. Male rabbits enter live traps readily looking for a fight, and females are always attracted to the smell of a strange male. Use on a small piece of white cloth or similar material to simulate fur, and add a fresh green leaf of cabbage or lettuce for extra appeal.

Our humane and safe Messinas Animal Stopper creates a sensory barrier that works by smell, taste and feel and can be applied every 30 days regardless of weather or watering. It is pleasant to use, dries clear and odor free and is safe to use around fruits and vegetables.

ASTOP-32 32 oz. **$13.50**

Eastern Cottontail Rabbit (Sylvilagus floridanus)

This is the most common rabbit in North America preferring habitat that contains edges of thick shrubby cover. Cottontail rabbits eat a large variety of vegetation with sweet clover being a favorite. They also eat wheat, crabgrass, timothy and cultivated plants. In winter they eat twigs, buds, bark and the tips of vines, shrubs, and small trees. Young trees and shrubs are more vulnerable. These rabbits also eat their own feces due to a dietary deficiency so adding a few droppings to your trap can increase trapping efficacy. Cottontails rarely live beyond 12 months but have very high reproductive rates and can have up to six litters per year. The average litter size is 5 young per litter, and they are born after a gestation period of 28-29 days. Wooden traps work better than cage traps and covering them with some brush or tall grass also helps to encourage them into your set. Add fresh apple slices along with lure designed to capture rabbits.

No-See 'Um Chimney Raccoon Trap

The innovative No-See 'Um chimney raccoon trap fits right down into the chimney flue and is hidden from sight. The locking mechanism of the No See'Um trap has a visual indicator (flag) attached which allows you or your customer to check the trap from the ground. When the flag drops, you have made a capture!

The body of the No-See'Um is 1" x 1" galvanized mesh and will deliver years of service. The doors at both ends of the trap are constructed of sturdy 10.5 gauge 1/2" x 2" mesh. The trap fits both 9" x 13" and 13" x 13" chimney flues. The trap itself measures 9"W x 5"H x 38"L and weighs approximately 13 pounds. $25 PER TRAP FLAT RATE SHIPPING

The Coontroller™

An industrial strength exclusion device designed to allow raccoons to leave a structure but not allow them to return through the original access point. Appropriate for use when raccoons are in an attic, chimney or underneath an enclosed shed or deck. The excluder features a unique cam locking double door that allows wildlife to push through to gain access to the outside, but locks behind them so if they try to re-enter, they are stopped cold. The Coontroller is 17" x 8" x 8" and is constructed of 1" x 1" galvanized 14 gauge wire mesh. Also effective for groundhogs, skunks, feral cats, armadillo and other similar sized animals. Note: This is not a trap; it allows animal to leave but not re-enter.

WCS54590 $125.95

WCS™ "OWDE" 8" Excluder 8" x 8" x 14"

Introducing the WCS™ "OWDE" one-way door, exclusion device. It measures 8"H x 8"W x 14"L and is made entirely of 1" x 1/2" mesh. This flush-mounted device is designed to mount easily and features a spring-loaded door. Raccoons can get out, but they're not getting back in!

WCSEX8 $44.25

RHINO™ PROCHUTE™ One Way Door

PROCHUTE™ One Way Door is a patent pending eviction device, designed to humanely remove raccoons, skunks, groundhogs, opossums, rabbits and similar size animals from attics, chimneys, decks/sheds and similar structures. Size: 11" x 9" x 7" [escape chute opening: 7" x 7"]

WRSG711 $71.75

R108 RHINO™ Raccoon Excluder One Way Door

The R108 RHINO™ Raccoon Excluder One Way Door is a new and innovative approach to raccoon exclusion. This product is perfect for getting multiple raccoons out of attics, soffits, chimneys and under decks without having to come in contact with the animal. The R108 model is designed to allow raccoons exit with ease and prevents them from getting back in. Installation made simple with 6 holes for secure fastening. If needed, use galvanized steel mesh to cover the damaged area and install the one way door over the hole, over the mesh using zip ties.

WR108 $56.50

Rodent control is more effective when addressed at the first sign of a mouse or rat. Integrated Pest Management (IPM) is key as rodenticide regulations increase. The best long-term solution is "whole home exclusions".

Weep holes, utility entry points, garage doors and siding gaps are common entry points at ground level, along with gable vents, ridge vents, and soffit returns at the roofline. Entry points larger than ¼" must be sealed with products that rodents can't chew through. Xcluder, PrevenChew, Copper Mesh, RodentStop and Metex Rat Tape help stop entry. Metex Rat Tape has a dense stainless steel mesh core sandwiched between two layers of butyl tape. Great for covering entry points and adheres to most building materials. Installing RodeXit or Xcluder™ Door Sweeps helps prevent entry at the bottom edge of garage doors. Install HY-C foundation vent covers for all foundation vents. Fill weep holes with Xcluder™ fabric, Copper mesh, PrevenChew or specially designed stainless steel or plastic retrofit weep hole covers. Install Kritter Kaps® to close the base of siding corners and use Pest Armor L-mesh, or Pest-Blok under siding at the sill plate. Rodents are good climbers so preventative measures must be taken along the roofline. Inspect soffit returns, gable vents, ridge vents, plumbing vents, and chimney areas and repair if necessary.

Habitat modification and sanitation are key to controlling rodent populations. IPM based on monitoring, prevention, and control can eliminate or greatly reduce the use of pesticides. Removing debris, cover, food and water are essential in rodent control programs. Trapping can reduce populations, if you are knowledgeable and persistent. Setting many traps helps with success and speeds up the process. Using 12+ mouse traps for a few mice in a home is not overkill. Boxes that hold multiple rat or mouse traps, like the Kwik-Katch XL, use of expanded trigger style traps and using a variety of baits all increase capture rates. WCS™ NB Squirrel and Rodent Bait is a time-tested favorite. WCS™ Fearless, has an ingredient scientifically proven to decrease neophobia (fear of new things). Adding a cotton ball or poly-fill to a set can attract rodents as nesting material.

Pre-baiting traps and not setting them for a few days can help minimize neophobic behavior. When trapping rats, don't place traps close to main burrows as it can "spook" them. Traps and bait should be handled with gloves and kept away from things that may contaminate them like odors from pesticides or cigarette smoke. Multiple catch traps work on the principle that mice explore holes to find safe harborage and cover. Examples are the Wind-up multiple catch trap, Victor Tin Cat, or J.T. Eaton Repeater

Some situations need the use of rodenticides to effectively control populations. Rodenticides are labeled for use with specific rodents, and the label is the law, be sure the species you are trying to control is listed. Using a quality bait station greatly decreases the likelihood of a child or pet getting to the rodenticide. The UltraBait Vandal Resistant Bait Station is a durable coated steel station with removable plastic liner that holds all types of bait or plastic rat sized trap such as a T-Rex or Big Snap-E. Rodents that succumb to poisoning can die anywhere. It's not true that they seek water and always die outdoors. Odors from dead rodents should be considered when deciding what process to implement to resolve the issue. If a large infestation exists, trap and remove as many offenders as possible before using rodenticides. Dead rodent smells can dissipate over a few days to a week. If odors persist, find and remove carcasses. When bodies are removed, the surface can be sprayed with Bac-AZap or Epoleon NnZ to quickly knock down the odor. If carcasses cannot be found, odors can be controlled using an atomizer unit along with Epoleon N-100, Citrus Neutrox, or similar odor control products.

Once rodent numbers have been reduced or eliminated continue to monitor or create a regular control program to keep rodent numbers to a minimum as rodent populations can rebound quickly.

End the Rat and Mouse Game

Whether you're developing a large control plan or just need a couple of mouse traps, we have the traps, glue boards and bait stations for the task.

Victor® Kill Vault™ Mouse Trap - 2-Pack

The Victor® Kill Vault™ Mouse Trap is unlike other traps in that it offers a no-see, no-touch experience with easy, stress-free baiting and setting. Lures mice inside and eliminates the chances of a pet or young one finding the rodent's body. Kill-Gate™ produces a quick, humane kill. The mouse is entirely contained within the trap, which may then be discarded or emptied for reuse.

NWSM267 $10.25

Evolve™

A soft bait interferes with the reproductive mechanisms of both male and female mice for pest control. Adding it to your Integrated Pest Management (IPM) program targets the source of an infestation for long-term success. As a FIFRA Section 25(b) exempt product it poses little to no risk to people, pets, and predators.

WCS "Premium Grade" Paste Baits

Paste Baits $8.75/8 oz. $15.50/16 oz. $84.75/gal.

Rosebud (for Skunk) NWS005
This is a loud, reach out and "grab ya" bait. It really holds their interest and is loaded with an attractant that inspires excitement, along with a pungent odor carrying side tone. As the name implies, especially made for the "Little Stinkers". This bait contains no fish and is cat resistant.

Corn Dog (for Raccoon & Skunk) NWS008
This versatile bait attracts both Raccoon and Skunk. It has an overtone aroma of succulent sweet corn, along with a "kicker" of sweet honey, and contains bits of kernel corn for eye appeal that will entice even the finickiest critter. This is a great year round attractor.

Mellow Yellow (for Skunk) NWS004
This paste bait for skunk mimics nature's perfect fruit, the Bannana! Powerful, lingering, and intensely sweet. A good Spring & Summer bait that animals really work for. WCS "Premium Grade" baits will not dry out like some of the others, and is cat "resistant".

Tree Berry (for Raccoon, Skunk, Possum) NWS003
Our personal favorite for a general-purpose paste bait. This sweet smelling bait fills the air with its aromatic scent and is a combination of tree-ripened fruit essences and puree, along with an under tone of bush berries. Place on your favorite bait holder and position so animal must pass over the pan to get to it and watch the results. Great on coon, skunk & opossum.

WCS™ Butter Munch Bait
A highly palatable and aromatic blend of butterscotch, nut butter, and other food grade ingredients (no peanut products). Designed for raccoons and skunks but has proven itself equally attractive to groundhogs, squirrels and other rodents.
NWS023 $8.75

Banana Blast Skunk Lure - 8 oz
WestBB-8 $17.95
A great skunk lure, it's effective on Raccoon and Opossum as well!

Sweet Berry Treat
WESTSBT-8 $17.95
A Multi-Purpose Liquid Lure, that works on Raccoons, Skunks, Woodchucks, Possum, Rats & Mice. Very easy to use, comes in a flip-top bottle, very fragrant!

General Biology, Behavior and Reproduction

There are three species of skunks in North America the Hooded, Spotted and the most common the Striped Skunk. The Latin name for Striped Skunks is Mephitis mephitis meaning double foul odor. Skunks have very poor vision and are poor climbers. Skunks are mainly nocturnal but will sometimes move morning and late afternoon. Skunks are omnivores eating both vegetative and animal matter. The main food items eaten are insects including worms, grubs, and beetles. There practice of digging worms and grubs from lawns creates very noticeable conical shaped pits. During the winter months skunks will den up during the coldest days and may lose up to 40% of their weight. Striped skunks are not social except during winter months in colder climates. In these colder climate's skunks will communally den with up to 12 skunks at one den site. Skunks breed February-March with males traveling long distances to seek out receptive females. Skunks are born with the glands that produce their famously odorous musk. The average litter size is six, but there can be up to twelve. Skunks can spray up to 4-5 times in a row, but this is uncommon.

Preventing Conflicts

The best preventative is to minimize potential den sights by removing junk and brush piles. Install Dig Defense or PVC coated wire mesh buried in the ground along foundations and sheds to prevent denning beneath buildings. Do not feed pets outdoors. Beehives should be elevated three feet off the ground. Deodorizing chemicals that break down the thiols like Epoleon and Citrus Neutrox work best. It is important to treat the area that was sprayed. Delivery systems like Hudson FOG Electric Atomizer will save time, chemical and labor.

Trapping

When cage trapping skunk's traps that are 24"x7"x8' are best suited. Trap covers are recommended for a scent free experience. Other good options are the Spay Proof Skunk Trap and the DuraPoly Plastic Catch Trap (skunk size). Covering the bottom of the cage trap with dirt attracts more attention and prevents "trap shy" animals from walking on exposed wire mesh. Good bait selections include WCS Rosebud, WCS Mellow Yellow, and WCS Yellow Stripe trailing lure. Adding some banana, chicken, or honey can assist in drawing the skunk into your trap.

"Yellow Stripe" Skunk Trail
WCSYS01-4 $9.50/4oz. $24.75/16oz. $163.25/Gal
As the name implies, this skunk trail scent really lays down a "yellow stripe" leading to the trap. Very fragrant, and sweet smelling, will not attract cats. Lead the skunk right into the trap. Will work equally as well on raccoon and opossum.

Procoon Raccoon Lure by Leurres Forget

This raccoon lure is from the legendary Leurres Forget Lures in Quebec, Canada. It is highly effective in all seasons, even during cold Canadian winter months. Raccoons are attracted by the irresistible draw of the Procoon unique curiosity scent.

SNAKES

Humane Solutions for Snake Removal

We love snakes, but we know that they aren't always welcome visitors. Along with quality-made tongs and hooks for professional handlers, we carry traps and repellents that make removal safe and easy.

SNAKE TRAPS & LURES

WCS SNAKE GUARD® Snake Trap

A live, single use trap with a "no-touch" removal system. Humane, effective and simple to use, this closed cardboard trap contains a super-sticky glue pad. A snake entering from either end cannot escape. To release the snake, transport the trap to a remote location and pour a liberal amount of vegetable cooking oil on the snake and the glue. The snake will usually work itself free in under an hour.

NWS0105	Single	$22.50
NWS0105C	Case of 12	$235.75

Cahaba Snake Trap & Glue Pads

Weather-resistant and commercial-grade, this plastic trap protects the glue pads used for trapping snakes or other rodents. Used with the appropriate-sized pad, it easily handles all kinds of nuisance snakes indoors or out. When the snake is caught, the glue pad and snake can be tipped into a bucket.

WCSCSTL	Large w/1 glue pad 32"L x 10"W x 2.5"H	$64.75

WCSCSTRS	Small Glue Pads 4 pack	$7.75

Strike 'Em Snake Lure

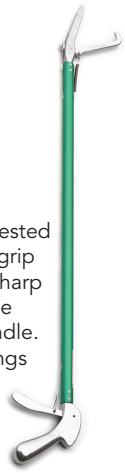

Snakes won't be able to resist this powerful formula created by the pros. Just drop 4-6 drops on a cotton ball or sheep's wool and place in the center of your glue trap. Usually takes 12-72 hours, depending on the snake's feeding cycle. Caution: Keep out of reach of children and avoid contact with eyes.

WCS™ Shorty Tube Trap™ - Rust Resistant

This trap is a shorter version of the classic Rust Resistent Tube Trap, but with a few new advantages. Just like its big brother, it is treated with an electro-plating process which is black in color and is highly rust resistant.

This tunnel shaped trap is a very effective squirrel and rodent trap. Constructed of 21-gauge steel, the trap is 4.5 inches in diameter, 7.5" inches long, and is powered by a beefy double torsion spring. It offers a zero clearance strike and its smaller size allows it to be used in spaces where larger traps just won't do. Used either baited or non-baited, the Shorty Tube Trap is a natural attractant to squirrels wanting to run through it or hide in it. Once the squirrel reaches the triggering pan in the middle of the trap, the double torsion spring triggers the strike bar.

TUBE002-1 $37.95

Safeguard 53070 Rodent Trap

The Safeguard Rodent Trap is perfectly sized for mice, voles, chipmunks, flying squirrels, etc. It measures 10"L x 3"W x 3"H and is solidly constructed of galvanized sheet metal. It has a positive locking rear door for easy baiting and animal removal. It has a zero-clearance entry door, meaning the spring-loaded door folds into the trap, and the trigger/pan assembly can be set as sensitively as needed for an effective capture. It has holes for air circulation in the top and sides of the trap. If you're looking for an alternate to the Sherman-type traps you will find these to be an attractive replacement.

Customized chimney caps with WCS

Odd sizes? Tricky flues? Give us a call at 1-877-684-7262 and we can help customize chimney caps to your precise specifications. Here are a few things to keep in mind when sizing up your job:

- Custom models can be created for top mount or outside mount applications.
- When determining proper cap size, make sure the cover height measures a minimum of 5" from the top of highest flue tile.
- In situations where oil, coal, or wood pellets are used as primary source of heat, do not use aluminum or painted-black galvanized steel covers.

A & B – measurements of the crown of the chimney; C, D, measurements for each of the flues in the chimney (inside measures); E – measurements from outside of each flue to the long side of the crown: F measurements from the outside of each flue to the short side of the crown and measurements between each flue, if multiples.

Draft King - Single Flue

HY-C designed their single flue caps for outside mounting to the flue liner, ensuring unrestrictedventilation. The stainless steels cap's durable 16 gauge base is slightly turned-in on the bottom to create a tight seal on the flue tile and comes with hex-head bolts for installation. Chimney's without a flue time extending above the crown require an optional Leg Kit* for Slip-In installation.

AT-4 Attic Tent® - 25" X 54" X 13H"

The Attic Tent® is the ultimate attic access insulation cover ever invented (attic stairs, scuttle holes, knee-wall doors, and full-size doors.) Its primary design is to stop air infiltration between the home and attic, the most common medium for wasting costly residential energy, during both hot and cold seasons. The HVAC systems in homes are designed for a closed envelope making air balancing with supply and return air, very critical. Every time these systems are operating they create a positive or negative pressure, thus forcing conditioned air out or drawing outside air in the home. It also keeps out unhealthy insulation and dust particles from the attic.

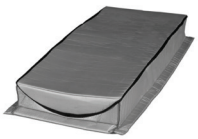

The Attic Tent® is a specially engineered, patented insulator designed to create an air transfer barrier between your attic and living areas.

Main Materials: Nylon Fabric and Polyurethane Form + Flame Retardant AT-4 Dimensions - 25" Wide - 54" Length - 13" height clearance with a 2" mounting Flange.

Note: This is the second most commonly used size for fold down attic stairs. Used for fold down attic stairs, scuttle holes and knee wall doors.

WCSAT-4 $139.95

Aprilaire Model E070 Dehumidifier (70 Pints/Day)

The Aprilaire Model E070 Dehumidifier is designed to dehumidify the air coming into the unit by passing the incoming air over an evaporator coil to drop the air temperature below the dew point of the air. Moisture is removed from the air and drained out of the unit to a common floor or waste drain. The air is then reheated in the condenser coil and exits the unit. Dehumidification occurs until the set point is reached, then shuts off until periodic sampling determines a need for operation.

Epoleon N-100

Pet urine odor and other animal related odor problems result from alkali odors (ammonia, Trimethylamine), and acidic odors (Hydrogen Sulfide, Methyl Mercaptan) emitted from urine and feces. When your pet releases urine, PH property of urine is alkali; however, after being exposed to air, it changes from alkali to acidic. These odors are not only bad for humans but also for your pets. The most important fact is that pet odor control should be carried safely so that both of you can live comfortable.

Use the Malco HP18KR for making holes along the edge of sheet metal and vinyl plastic including rivet or screw fastener holes in metal ductwork and vinyl window extrusions, or hog ring holes for attaching signs or bumpers to chain link fences or equipment cages.

HP18KR $119.95

Andy Aluminum Handled Snips 12" (Gripped)

Malco's 12" Gripped Andy Snip's features the same design and cutting power of other Andy Snip models but with added handle comfort. Grips add better comfort, fit, and control over other models. All Andy Snips are ideal for cutting vinyl siding, aluminum, copper, or sheet metal.

M12NG $51.25

Sheet Metal Folding Tool: Fixed Length and Depth

Malco's 12F, 18F, and 24F Sheet Metal Folding Tools offer a premium choice for bending and forming metal. Each model is made with superior design and includes handy sight holes to ensure proper depth alignment.

12F model - 12" (31 cm) long with 3/8" (9.5 mm) & 1" (25.4 mm) depths. This tool is ideal for HVAC applications such as folds for drive cleats and big deep folds for joist panning, plenums, register boots, trunk line end caps, and more.

12F $21.50

18F model - 18" (46 cm) long with 3/8" (9.5 mm) & 1" (25.4 mm) depths. This longer sheet metal folding tool ensures a more uniform fold.

18F $27.25

24F model - 24" (61 cm) with 3/8" (9.5 mm) & 1" (25.4 mm) depths. This model may also be used as a mini-brake by roofing and siding applications.

24F $38.95

NO-PEST Light Covers

"No-Pest" Light Covers give your recessed light fixtures and your property numerous advantages over invasive pests and the trouble they bring. Features and benefits of this unique pest prevention method include easy installation and cleaning, attractive design, and most importantly, pest-impervious construction.

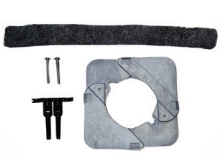

WCSTRLC-1 $15.95

Critter Quitter Vent Pipe Cover

Critter Quitter® Vent Repair was developed to allow quick and easy repair of damaged plumbing vents. This is accomplished by a patented internal component that directs rain into the vent pipe keeping the damaged portion dry. No removing shingles, simply cut to match the roof pitch and slide onto the damaged vent. Tighten the screws and the job is complete.

WCSCQ3	(3" Small)	**$30.75**
WCSCQ4	(4" Large)	**$32.25**

X-Plate Universal Escutcheon Plate

Unprotected wall openings for pipes and conduit are a common pathway for rodents and other pests. Traditional escutcheon plates require stocking multiple sizes to accommodate different pipes and can be hard to secure in place, making them easy for rodents to push out of the way. X-Plate accommodates the most common pipe sizes, and our unique anchoring system ensures it stays firmly in place.

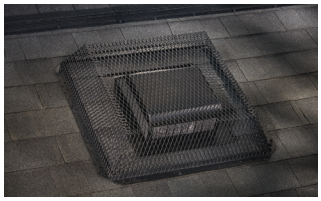

WCS162861 $14.50

VENT PROTECTION – ROOF AND FOUNDATION

HY-C Roof VentGuard™

This product prevents raccoon, opossum, squirrel and other pesky animals from entering structures through roof vents. Most roof vents are made of a plastic material with simple window type screening or no screening at all. Animals can and do chew through these vents to enter the attic where they can destroy wiring, cause leaks and do severe damage. Made from heavy duty 18 Gauge expanded metal mesh in Stainless Steel or Galvanized. Tapered units nest inside each other for easy transport and can be fastened with roofing nails, caulk or tar.

HY-Guard Dryer Vent Guard - 6"

HY-Guard Dryer Vent Guards can prevent access to your home by unwanted guests like birds and rodents. They are also designed to prevent lint build up, thereby reducing the possibility of dryer related fires. Even better, they're made by HY-C, a name you can trust when it comes to pest exclusion. Material - Plastic, Color - White, Tan, Brown.

DEV-6P-B-1 $9.50

HY-GUARD EXCLUSION® Code Compliant Steel Dryer Exhaust VentGuards™

Available in two sizes, the 8"model covers 6" dryer vents and the 6" model covers 4" dryer vents. Both models are forged from steel with a white powder coat paint finish to protect against rust. The front panel with its vertical bars is held in place by a zinc-coated steel clip, and the panel opens on a hinge system to allow for routine dryer vent maintenance. The covers come with three pre-drilled mounting holes that accommodate screws for quick, easy installation. These code-compliant dryer vent covers feature vertical bars that create a barrier against birds and wildlife while helping to prevent lint buildup and dryer fires.

Keeping Everything Under Control

When you're handling Birds or Wildlife, the last thing you should have to worry about is the durability of your equipment. We find the best and offer the best solutions that are tailor-made for tricky captures.

Hand Nets

WCS Hand Capture Net

The professional choice for close quarters bat capture and even squirrels in the fireplace! Our net's soft, ¼" black nylon mesh keeps animals safe and comfortable, while the 5" foam grip handle makes for easy gripping. 11"w x 15"l x 12"d.

WCS3401 $22.50

WCS™ Magnum Net

The standard for brute strength, durability and professional grade performance. We make our Magnum with a tangle free, super soft nylon netting – safe for large birds, domestic animals and wildlife. Then we add an extra heavy-duty aluminum handle with a double walled frame, 32" x 41" teardrop hoop, weighted 48" deep net and 2" mesh accommodates animals to 60 lbs. Ideal for goose control. Handle requires assembly

NWS8430Kit-2 48" **$153.75**

WCS™ Bat-Bird Mammal Net

A versatile favorite for small animals. This square net holds bats to cats and comes with a tough 6' aluminum handle that telescopes to an incredible 18'! With soft, fine-mesh black netting. 17" x 19" D hoop, 24" deep Micro Mesh net with ¼" mesh.

NWS3543 $76.95

Dura-Flex By Tomahawk

Tomahawk doesn't mess around when it comes to net construction. Their flexible Standard and Heavy nets boast full 1" aluminum shafts and solid polycarbonate hoops. The Dura-Flex fits flush against hard surfaces, allowing you to stand upright while netting and restraining, while a tie-off cord provides a comfortable 3' of space beneath. Too small to prevent animal entanglements, the ¼" nylon mesh won't unravel or weaken from adjacent tears. Two layered woven nylon hem around the hoop. 24" neoprene slip-free grip and a shaft that holds up to heavy jobs. 48" deep.

Standard Dura-Flex with Shaft

Perfect for cats, small/medium dogs, bats, birds, raccoons and rodents. 60" circumference and ½" x 5' polycarbonate hoop.

Poles

Ketch-All Poles

Our personal favorite is also the number one choice of wildlife professionals around the world. Ketch-All's looped poles handle almost any animal in any situation – up a tree, under a building, down a storm drain – you name it. In addition to restraining cats and dogs, professionals have used them for the humane capture of bears in the California mountains, wolves on the Alaskan tundra and alligators in the Florida everglades.

Made in the U.S.A. since 1952, these tough poles are quality-constructed from aircraft grade aluminum. A draw cable locking mechanism allows for various loop sizes and a quick release on the back of the pole makes for controlled handling. When retracted, extended versions work well as heavy restraining devices. In a variety of sizes:

3' Standard Ketch-All Pole Favored in kennels for cats and small dogs.
NWS0901-3 $78.50

4' Standard Ketch-all Pole The most popular pole for general use.
NWS0901-4 $86.25

5' Standard Ketch-all Pole When you need additional length and a larger noose.
NWS0901-5 $96.25

4' - 6' Ketch-all Pole Extending/retracting version can reach where you can't.
NWS0901-4-6 $116.95

7-12 ft. Extension Ketch-All Pole Great for rescuing animals from waterways, trees or storm drains.

SKUNK

Skunk Scram™ Professional Skunk Repellent - 22 lbs.

Skunk Scram™ Professional is the new addition to the Scram family of repellents. It is designed specifically to stop and then prevent damage caused by skunks. It is both highly effective and long lasting. Skunk activity increases primarily in the spring and is nocturnal. Skunks are a nuisance especially in urban & suburban areas, as they produce a powerfully pungent spray; can damage lawns extensively, and dig in garden beds while searching for food.. They are also one of the major carriers of the rabies virus as well as the host for the canine parvo virus disease found in pets.

Skunk Scram™ Professional is a proprietary blend of all natural ingredients that repels skunks and alters their environment in two ways:

Food tastes bad and their digestive systems are disturbed

Tunnels & surrounding soil become bad-smelling

Skyhawk Hub and 5 Sensor Bundle

The Hub and Sensors make it easy for pest and wildlife control technicians to monitor deployed traps with real-time notifications. Here's how it works: Skyhawk's Hub is deployed in a central location at the property to be monitored. Requiring no external power or Wi-Fi connection, the Hub is easy to position where it provides the most coverage. Each sensor is paired to the Hub through the Skyhawk CE app and then attached to an individual trap. Each sensor's location and description are recorded in the app, making it easy to find which traps have been triggered and where they are. When a sensor detects activity, it communicates locally with the Hub. The Hub then dispatches a notification over its dedicated cellular connection to your registered mobile devices. The result is a powerful and easy-to-use platform that makes monitoring your traps as easy as checking your phone.

No Smells, No Germs, No Fuss

Wildlife control work can mean fighting a lot of unpleasant smells – skunk spray, urine, feces, bat guano, dead wildlife, blood – the list goes on. To win the war, we offer a range of products that neutralize air and surfaces. These scented and unscented products don't simply mask odors, they eliminate them. To destroy dangerous bacteria, choose a product described as a disinfectant.

SPRAYERS & FOGGERS

Fogmaster Jr.

When a space is too small for an industrial fogger and too large for a trigger sprayer, use the Fogmaster Jr. to disperse lightweight oil- or water-based fluids for odor control. Made of corrosion-resistant nylon, vinyl and polyethylene to last job after job., Easy to use. Just twist off the power head,, pour in deodorizer or disinfectant mixture, And replace cap. Rotary valve allows you to fine tune the output from fine light fog to coarse mist. Quart capacity.

WCS™ Galvanized Euthanasia Chamber

Euthanasia is a process with legal and ethical responsibilities, and we take it very seriously. Our CO_2 chamber is the industry-standard for humane dispatch, a cost-effective product that gives minimal distress to wildlife. Measuring 14" x 14" x 38", it is capable of handling traps up to 36" long for simple top loading. We use all galvanized steel for long use and rust-resistance and include a clear viewing window in the lid. A screw-type port in the lower portion makes it easy to link the gas bottle. Includes hose for connection to a CO_2 regulator (regulator sold separately, see below).

NWS0123 $256.25

CO_2 Regulator

An essential component for delivering gas safely and humanely. Attached to the CO_2 tank, the regulator monitors pressure via two gauges. One gauge reads the gas pressure being delivered to the tank, giving you an accurate reading of the CO_2 flow. This helps you minimize gas waste and ensures the animal is receiving the proper gas distribution. The other gauge reads the tank pressure itself and is an excellent indicator of how much gas is left. Never deliver gas to tank without a regulator.

NWS0121 $199.95

WCS Electronic $C0_2$ Saver

Eliminate worry about extended gas flow. Connected to a regulator, this digital, automatic shut-off device controls the on and off flow of CO_2 delivered to chamber and allows for programmed timing. Enter the time interval you want the gas to be set for and the saver will automatically shut off the CO_2 after it has elapsed. A mounting bracket allows you to hang the unit on the regulator knob, making connections easy and convenient. Save your precious time and gas supplies.

CO2ASO $307.50

PERSONAL SAFETY

Your tools are replaceable. You are not. Guard yourself against bites, scratches and infection with our selection of field proven protective gear from manufacturers who never cut corners on safety.

GLOVES

Choosing Vet-Pro Gloves

When it comes to choosing gloves, we always start by asking whether we want more protection from penetration or from crushing. Handling the sharp teeth of cats (penetration) will require less steel plating than, say, the jaws of a coyote (crushing).

Flesh wounds are the easiest way for professionals to get infected, so we never skimp on quality. It's important that you use gloves as protection and as much as possible limit direct contact with the animal. The use of a capture pole or animal grasper is always best (see page 75), with gloves used as a backup solution if the animal gets free from the capture tool. While no glove is puncture proof, our entire Vet-Pro selection is highly puncture resistant and will last you a long time when properly cared for.

Animal Handling Vet-Pro

All Vet-Pro gloves (except the Forester) are made of hand-cut, split grade cow-hide palomino leather and a ballistic lining of DuPont Kevlar felt. Unlike knitted or woven versions, Kevlar felt is tightly packed for maximum puncture resistance. Double-stitched with Kevlar thread, with a loose fit for dexterity and emergency removal. The Forester glove's palm is lined with Kevlar and the cuff is double thick palomino leather. Style descriptions are listed below.

WCS "Premium Grade" Baits & Lures – Proven to perform!

WCS stocks the widest range of choices in baits and lures because species, location, temperature, weather conditions and part of the country all play a role in what might be attractive to your target. WCS's "Premium Grade" Baits and Lures were developed in the field and have been used for more than 30 years. Other bait & lure lines that we carry have been used for more than 50 years. Just starting out or if you've been trapping for years, we recommend experimenting with a few different baits & lures, in different traps, so you can judge the results. Remember too that what worked in the past may not always work in the future. Changing up your bait from time to time can also help when conditions in the area change. If you want advice for your specific situation or just general info, give us a call at 1-877-684-7262, chat with us online at www.ShopWCS.com or email us at support@ShopWCS.com.

WCS "Premium Grade" Paste Baits

Any four 8 oz. WCS paste baits for $28

Paste Baits $8.75/8 oz. $15.50/16 oz. $84.75/gal.

Acorn (for mice, squirrel, chipmunk) **NWS019**
A rich mix of Pure Acorn Essence oil and pulverized white oak acorns that squirrels simply find irresistible. This bait, like all "Premium Grade" bait products, is spiked with an anti-drying agent to increase the baits effectiveness.

Applelicious
(for Groundhog, Muskrat, Raccoon, Skunk) **NWS014**
Great for groundhog, muskrat, raccoon and skunk, this paste-based bait has an explosive apple aroma, designed to fill the air around your trap. Field-tested to attract more finicky critters.

Black Anise (for raccoon, skunk) **NWS021**
Truly a general purpose bait, made with 100% Pure Anise Oil. Great on raccoon, skunk, even fisher, as this sweet smelling paste fills the air with its aromatic scent.

Butter Munch Bait **NWS023**
Our multispecies bait is a highly palatable and has an aromatic blend of butterscotch, nut butter, and other food grade ingredients (no peanut products). Designed for raccoons and skunks but proven equally attractive to groundhogs, squirrels and other rodents. This unique bait has a characteristic not found in other trapping baits as it can be molded or stuck to cage wire, under the pan, or rolled into small balls for use in dog proof traps. (Available in 8 oz size only)

Corn Dog (for Raccoon & Skunk) **NWS008**
This versatile bait attracts both Raccoon and Skunk. It has an overtone aroma of succulent sweet corn, along with a "kicker" of sweet honey, and contains bits of kernel corn for eye appeal that will entice even the finickiest critter. This is a great year round attractor.

Fearless Rat and Mouse Paste Bait **NWS015**
A proprietary blend of nut oils and meats (No Peanuts), seeds, and a special ingredient scientifically proven to reduce neophobic behavior in rodents. Excellent results with squirrels and chipmunks as well. This is quickly becoming one of our most popular baits for all species of rodents.

"Green Machine"
(for Squirrels, Rats, Mice, Chipmunk) **NWS016**
For mouse, rat, and squirrel. Unique and alluring, this is a great change up to traditional paste baits or liquid lures. The smooth paste consistency with added essential oils attracts all kinds of rodents, including mice, rats and squirrels. Caution: contains peanut products and oils.

Mellow Yellow (for Skunk) **NWS004**
This paste bait for skunk mimics nature's perfect fruit, the Bannana! Powerful, lingering, and intensely sweet. A good Spring & Summer bait that animals really work for. WCS "Premium Grade" baits will not dry out like some of the others, and is cat "resistant".

N. B. Squirrel & Rodent **NWS002**
N. B. Squirrel & Rodent is a rich mix of nut oils, nutmeats and seeds that squirrels and other rodents simply find irresistible. This bait, like all of the "Premium Grade" products, is spiked with an anti-drying agent to increase the baits effectiveness. Place on your favorite bait holder and position so animal must pass over the pan to get to it and watch the results. Great on all types of Squirrel, Mice, Chipmunks and Norway Rats.

Rosebud (for Skunk) **NWS005**
This is a loud, reach out and "grab ya" bait. It really holds their interest and is loaded with an attractant that inspires excitement, along with a pungent odor carrying side tone. As the name implies, especially made for the "Little Stinkers". This bait contains no fish and is cat resistant.

Tree Berry (for Raccoon, Skunk, Possum) **NWS003**
Our personal favorite for a general-purpose paste bait. This sweet smelling bait fills the air with its aromatic scent and is a combination of tree-ripened fruit essences and puree, along with an under tone of bush berries. Place on your favorite bait holder and position so animal must pass over the pan to get to it and watch the results. Great on coon, skunk & opossum.

Whistle Pig (for Groundhog aka Woodchuck) **NWS009**
For groundhog. This bait has just the right amount of leafy, green vegetables and fruit essences, which really make those finicky chucks, sit up and take notice. Long lasting and very fragrant.

WCS "Premium Grade" Beaver Lure Products

$14.95/2 oz. $24.75/4 oz. $76.95/16 oz.

Beaver Blaster
NWS001-2

This lure was 5 yrs. in the making. It's some of the finest beaver lure ever poured into a bottle. This oily, castor-based lure is loaded with just the right blend of essential oils and is 'fixed at its peak' of attracting capabilities. It stands up to the elements and will put a nice slick on the mud or water. Satisfaction Guaranteed!

Beaver Buffet Food Lure
NWS006

This paste lure has absolutely no beaver castor or oil added. Made for warmer weather, it has several food oils, plus a "curiosity kicker". Smear on peeled sticks by waters edge and watch the results. Won't arouse suspicion!

Beaver Castor
NWS011

Pure dark beaver castor, finely ground, then preserved. Great for beaver castor mounds or in formulation of lure. Good on coon, otter, fox, etc.

WCS "Premium Grade" Trailing & Attractant Products

Fruit & Nut Rodent Lure
NWS0302 $7.50/1oz. $14.75/4oz. $43.75/16oz.

This is the liquid form of our "Premium Grade" NB bait. We call this, "nut essence with a fruit twist." Proven effective on all types of squirrels, chipmunks, and other rodents. Use as a trailing scent, leading animal into the trap, baited with N. B. Squirrel & Rodent Paste, it is an unbeatable combination.

"Yellow Stripe" Skunk Trail
WCSYS01 $9.50/4oz. $24.75/16oz.

As the name implies, this skunk trail scent really lays down a "yellow stripe" leading to the trap. Very fragrant, and sweet smelling, will not attract cats. Lead the skunk right into the trap. Will work equally as well on raccoon and opossum.

"Strike-Um" Snake Lure
WCSTJSL $21.95/4oz.

Snakes won't be able to resist this powerful formula created by the pros. Just drop 4-6 drops on a cotton ball or sheep's wool and place in the center of your glue trap. Usually takes 12-72 hours, depending on the snake's feeding cycle. Caution: Keep out of reach of children and avoid contact with eyes.

WCS "Paste Bait Sampler"

"With our Bait Sampler you get (6) 4 oz. jars of our paste baits that will give you a variety to attract Squirrel, Raccoon, Skunk and Groundhog".

NWS010 in 4 oz. sample jars $34.95

GroundHog "Kokaine"
NWSGHK1 $42.75/gal.

Made and patented by wildlife pros for wildlife pros. Unlike those other hog baits this bait DOES NOT need an "eye attractant", it works all by itself and needs nothing else. We've had some of our referral pros testing this all over the country and now they are begging for more! It is simply that good. If you trap Groundhogs you need this bait!

"Sparrow Treat"
WCSSP4 $25.25/gal (6 lb millet)

Sparrow Treat consists of millet (white and/or red mixture) which has found to be preferential to house sparrows during trap testing over a period of eighteen months. This is the recommended bait to use when deploying Sparrow Sleds in "big box" stores. You can use a couple of pieces of white bread for EYE APPEAL to enhance the baiting program, but you should be using millet as your primary bait when your target is house sparrows.

Triple Treat Powdered Bait/Lure Combo
WCSTT $8.75/16oz.

Triple the power, triple the results. Unlike your typical powder baits, Triple Treat has additional food quality materials that enhance the fish powder base. Sprinkle some as a trailing scent into your cage and place about 2 tablespoons behind the triggering pan – no other bait or lure is necessary. Won't wilt or spoil in high heat. Great for raccoon, skunk, opossum, weasel, mink and more.

Ground Mouse Paste Bait
NWS020 $13.25/8 oz. $21.95/16 oz.

100% Fresh Ground WILD Mice just like predators prefer. This ground mouse bait is preserved fresh, not tainted, and does not contain laboratory mice as a filler.

Cottontail Cager
WCSBNCC-4, WCSBNCC-16, WCSBNCC-GAL

For rabbit. Pull in territorial males and curious females. Lure contains heavy, pungent dose of mature male cottontail glands, mixed male rabbit urine and curiosity ingredient. Males will come looking for a fight, females for fun. Use on small piece of white cloth or similar to mimic fur and add fresh greens for extra appeal.

Black Magic Bruin
WCSBNBMB $28.50/gal.

Another time tested favorite, particularly among Canadian outfitters, primarily used to help Black Bear find bait stations. Bear will relish it and return for more. Use as a trailing scent, this cannot be over applied and is completely edible. Apply single drop to an ounce or more of your favorite bait and set every few feet.

Masked Magic
WCSBNMM-4, WCSBNMM-16, WCSBNMM-GAL

For Raccoon. Masked Magic is a viscous lure with a sweet, penetrating odor. The blend of seven ingredients, properly aged make it a combination call/curiosity/food lure. They investigate even when not hungry. Its odor is clinging and long-lasting; get it on your fingers and you'll need soap and water to remove it. Fortunately, the odor is pleasing. Raccoon really work for this lure.

Muskrat Love
WCSBNML-4, WCSBNML-16, WCSBNML-GAL

A reliable, time-tested lure. A sweet, share food blend with many attractive natural oils & a touch of mink. Muskrat Love also attracts raccoons! Muskrats are strongly attracted to lure & can pinpoint its source quickly. With small home ranges, the penetrating odor quickly spreads low, at their face level, across water or ground to saturate their range.

Bob Wilson's GREEN Beaver Lure
WCSGBL-4 $26.75/4oz. $87.25/16oz.

The Original Bob Wilson's Green Beaver Lure. Loaded with castor, blended with oil and those special ingredients that bring beaver year 'round. This is Trapper Bob Wilson's original recipe … "don't go trapping without it!"

"What's the difference between Bait & Lure?"

We get asked this question often, so take a look below at generally accepted definitions:

- Baiting covers all actions related to attracting animals to approach a trap. Unlike blind or positive set traps that rely on the animal's use of trails or pathways, baited-traps entice animals to leave the trail and investigate.
- Bait refers to materials that stimulate an animal to act on its natural desire to eat. Baits are typically solid or pastes. Lures on the other hand encompass a wider variety of enticements.
- Lures usually are categorized as food, territorial/sexual, or curiosity. Food lures function on the same principle as baits, except that lures are generally a more liquid consistency. Territorial/sexual lures exploit the instinct of animals to protect their property and females. Curiosity lures take advantage of animal desire to investigate new smells.

WCS carries one of the largest selections of Baits & Lures, from tried & true old favorites to new formulas!

Dave Scifres Baits & Lures

Coon Tar

A liquid raccoon bait and trailing scent specifically formulated for raccoons to eat. Raccoons can't pass it up. ADC guys buy it by the gallon. Works well all year long. It is freeze-proof, so it is very effective in DP traps.

WSCICT-8	8 oz.	$10.25
WSCICT-16	16 oz.	$15.50

Iroquois Beaver Call Lure

A castor-based beaver call lure that is laced with natural food ingredients, essential oils, and synthetic musk. It absolutely drives the beaver crazy. A quarter-sized glob on the bank will have beaver charging in aggressively trying to mark over the lure.

WSCII-2	2 oz.	$14.50
WSCII-4	4 oz.	$25.75

1804 Lewis & Clark Beaver Lure

In 1804, the Lewis and Clark Expedition headed west. In their journals they described the ingredients they used in their lures to attract beaver. This beaver lure formula was inspired by those writings with a modern twist of synthetic musk. This one is powerfully fragrant. Extremely attractive to beaver year-round.

WSCILC-2	2 oz.	$14.50
WSCILC-4	4 oz.	$25.75

Mackinaw Beaver Call Lure

A castor-food combination beaver call lure that is effective year-round. This one is loaded with castor, food ingredients, natural musk, and synthetics. The base of this lure is thick and heavy and is formulated to endure rain, freezing temperatures, or hot summer weather.

WSCIM-2	2 oz.	$14.50
WSCIM-4	4 oz.	$25.75

Moccasin Slide Beaver Lure

A great change up beaver lure with no castor. It contains natural ingredients that are extremely attractive to beaver. This is like no other beaver lure on the market. Use this one to catch the last beaver on ADC jobs or where someone ahead of you educated the beaver using castor.

WSCIMS-2	2 oz.	$14.50
WSCIMS-4	4 oz.	$25.75

Otter Call

This River otter gland lure is formulated with fresh otter glands, synthetic musk, and other natural ingredients. Use this lure at locations that otters frequent to activate the otter's natural characteristics to roll and play. Great for lured blind sets.

WSCIOC-2	2 oz.	$14.50
WSCIOC-4	4 oz.	$25.75

Fire In The Hole!

Coyotes and foxes will dig to reach this lure. During testing, PVC pipes containing this lure were broken by coyotes biting the pipes. Contains natural food ingredients, animal glands and synthetic musk.

WSCIFIH-2	2 oz.	$14.50
WSCIFIH-4	4 oz.	$25.75

Woo Chuck!

A great ADC groundhog lure that really draws in the chucks. This is a deluxe blend of desirable plant oils. It is effective in baited sets, but it really shines at positive sets. Put this lure on the ground at the outside entrance of double door traps to square up the chucks that are out of the hole or to coax them out if they are inside.

WSCIWC-4	4 oz.	$15.50

Proline Lures

$14.95/2 oz. $25.75/4oz. $76.95/16oz.

Alley Cat WCSTJAC
For feral cat. This is a bobcat gland based lure that was formulated with high dollar spotted cats in mind. It works equally well on ferals, mountain lions and during testing in Missouri and New Mexico proved effective with grey fox. Tests in Mississippi found it to outperform other cat lures taking bobcats consistently.

Bittersweet WCSTJBS
Bittersweet is specially formulated to stay put in the dog-proof style enclosed traps. Pre-bait your traps and set with confidence. Raccoons will work the trap until captured or cleaned out.

Cat Rub WCSTJCR
The name says it all. Cats will rub their chins, necks and body along anything you apply this lure to. Apply to rock ledges, tree branches and other eye level solid objects, with a trap up close. A wooden stick in the back of a cage is deadly with Cat Rub applied. Has been used in cages putting an end to many chicken-stealing Bobcats. Tests well on feral cats as well.

Clawdius - Feral Cat Lure WCSTJCL
A gland-based curiosity lure that is very "catty". Works very well on all species of cats including house cats. This thick lure will add a natural cat odor to any type of set.

Collarum Bait WCS014
This one was formulated to be used on the Collarum™ cable restraint for canines. Causes an excellent "bite & pull" response. M44's, grubstake and dirthole sets are all great uses of this canine food lure/bait. As an extra bonus we have found it to be an excellent spring skunk and raccoon bait. This bait is also known as "Silence".

Fisher Red WCSTJFR
Fisher RED was created to be especially attractive to Fisher in the Northeast. RoundUp was used as a starting point and tweaked to produce Fisher RED. A very good choice for multi species trapping, having equally good results reported while targeting coyotes, raccoons, fisher, and marten.

McRat WCSTJMcR
The hottest attraction available for muskrats. Excellent for use on float and pocket sets as well as food piles and edges of houses. A food attraction that when used on floats will require a twelve hour check!

Outreach WCSTJOR
OutReach is a louder food based lure. Out-Reach has a boost to carry it in extreme wet or frozen conditions, but not so loud that it would be less effective in warm dry conditions. Use year round in food sets such as dirt holes, grub stakes, etc. Strong enough to pull in Fisher, Marten, and Fox during the northern fur seasons. Can be used as a very effective call lure or in very small amounts directly at the set.

Porky WCSTJP1
When targeting Porcupines, Porky One is the only lure you will need. Highly attractive, and really makes them work the set.

Rat Bang WCSTJRB
Results are at least equal to McRat. It passed the same tests with super results. We formulated this one achieving the same reaction we saw with McRat. Muskrats are sometimes very attracted to differences in their environments. Using a combination of sets with different attractants can be very productive. Half the sets with McRat and half with Rat Bang will achieve superior results.

Roadrunner WCSTJRR
Roadrunner is a very special food lure that can stand on its own. It will work equally well on all carnivores. Attractive to coyote, fox, feral dogs, dingoes and jackals. Made of fresh animal products, this lure holds up well in all conditions as a mild food attractant. Extremely attractive to coyote when used as an early season lure. Works very well for "bite & pull" response devices like the Collarum.

Roundup WCSTJR
RoundUp is designed as a Raccoon food lure intended to pull them in regardless of current food availability. Great in cages, dog proof type traps or dirt hole sets. Equal results at the water or high dry ground. RoundUp is attractive to urban raccoons stealing the pet's food, grubbing in the lawn or raiding the garbage. This is a versatile lure that can be used for canines, raccoons, fisher and marten with great results. Every bit as good a canine lure as a raccoon lure, especially in warm weather.

Saber Tooth WCSTJST
Saber Tooth is formulated with the Coyote in mind and has extra curiosity ingredients that are very attractive to all coyotes. Use as a curiosity lure for all canines. Has proven itself equally effective on Cats!

Selector – Coyote WCSTJS
Selector – Coyote is a premium Coyote Gland Based Lure. Use at Flat or Post Sets. Has that little EXTRA bang! Selector – Coyote is Gary's choice for Spring and Summer coyote trapping. It performs well all season.

Selector – Fox WCSTJSF-4
Selector-Fox is of the same great quality as the original Selector with a primary FOX gland base. A Must Have lure for sets targeting Fox at Flat sets, urine post and other territorial-type sets.

Sweet Sabotage WCSTJSS
For summertime beaver. This lure has that little extra that works well in Hancock-type and other live trap situations for those castor shy beaver. This lure is a blend of many other attractive ingredients and works well on summer beaver. Has shown to be a great groundhog, squirrel and other rodent lure as well.

Sweet Skunk – Predator Lure
Attractive to all canines and bobcats. Often added to canine lures. Mild skunk odor with additional undertones.
WCSTJSWS $25.00

Target WCSTJT
Highest Quality Beaver Gland Lure. Made from only fresh ground glands. Will take young and old beaver alike.

Underground WCSTJU
Underground was formulated to cause moles to work the area under the trap. Using Underground will improve your chances with moles that dig around or under set traps. Apply to soil directly below trap triggers on scissor (Out-o-Sight) or harpoon traps and between the jaws of the NOMOL® mole traps. Because of its fresh insect base, the lure has been extremely effective on Raccoons that are grubbing in lawns. We suspect it will prove effective for Armadillos and Skunks as well.

Wildcat WCSTJWC
ProLine's fresh meat product, specifically designed for bobcats. A great all-around Cat attractant, this bait/lure combination was used during the filming of Gary Jepson's trapping videos. Pair it with Alley Cat for bobcats or with "Big Cat" for mountain lion.

Lanolin (Anhydrous) Base

Lanolin is a natural, waterproof emollient derived from sheep wool. It is commonly used to create a bait or lure that will withstand harsh weather conditions, i.e. rain. It acts as a moisturizer for use in cosmetics and skin and hair care products. Lanolin can soothe burns as well as irritated or dry skin and helps retain moisture. Lanolin can be added to soap and bath and body products for a rich, creamy lather. It also has other uses such as a lubricant.

Bait Solutions

Dunlap's Bait Solution
Dunlap's Predator Bait Solution is formulated to mix with the meat or fish base of your choice when making ground or chunk type predator bait. This bait solution is a mix of essential oils and musks that are highly attractive to all predators. You can use this bait solution with fresh or tainted meat or fish to create a bait that is excellent for coyote, fox, bobcat and coon.

JDBSOL $18.50/16 oz.

Dobbin's Bait Solution
This bait solution is an enticing liquid blend that when mixed with your chunked or ground bait, is irresistible to canines.

NWSPD015 $25.00/16 oz.

Locklear's Bait Solution
Locklears' Bait Solution pulls in coyotes, fox, bobcats and big boar coons. It has three triggers on predators that get them and keep them at your sets for maximum catch ratio. It can be used to prepare a gallon of any fresh or tainted meat or fish. This is a strong solution that reaches out over a long distance. Pour the bait solution in a container with the ground or chunked meat or fish of your choice, mix it in well, and go catch your predators, while keeping your bait expenses down.

CLBaitSol-16 $18.50/16 oz.

WCS's Standard Bearer for Humane Canine Capture

www.collarum.com

We set out to find the best humane canine capture trap on the market, and feel we've succeeded. The Collarum® throws a secure, non-choking cable loop over a canine's head and around the neck, making capture faster, easier and more humane than ever before. The Collarum is recommended for capturing dogs, foxes, dingoes, coyotes and wolves. Unlike other canine traps, the Collarum delivers three major advantages.

100% CANINE-SPECIFIC.

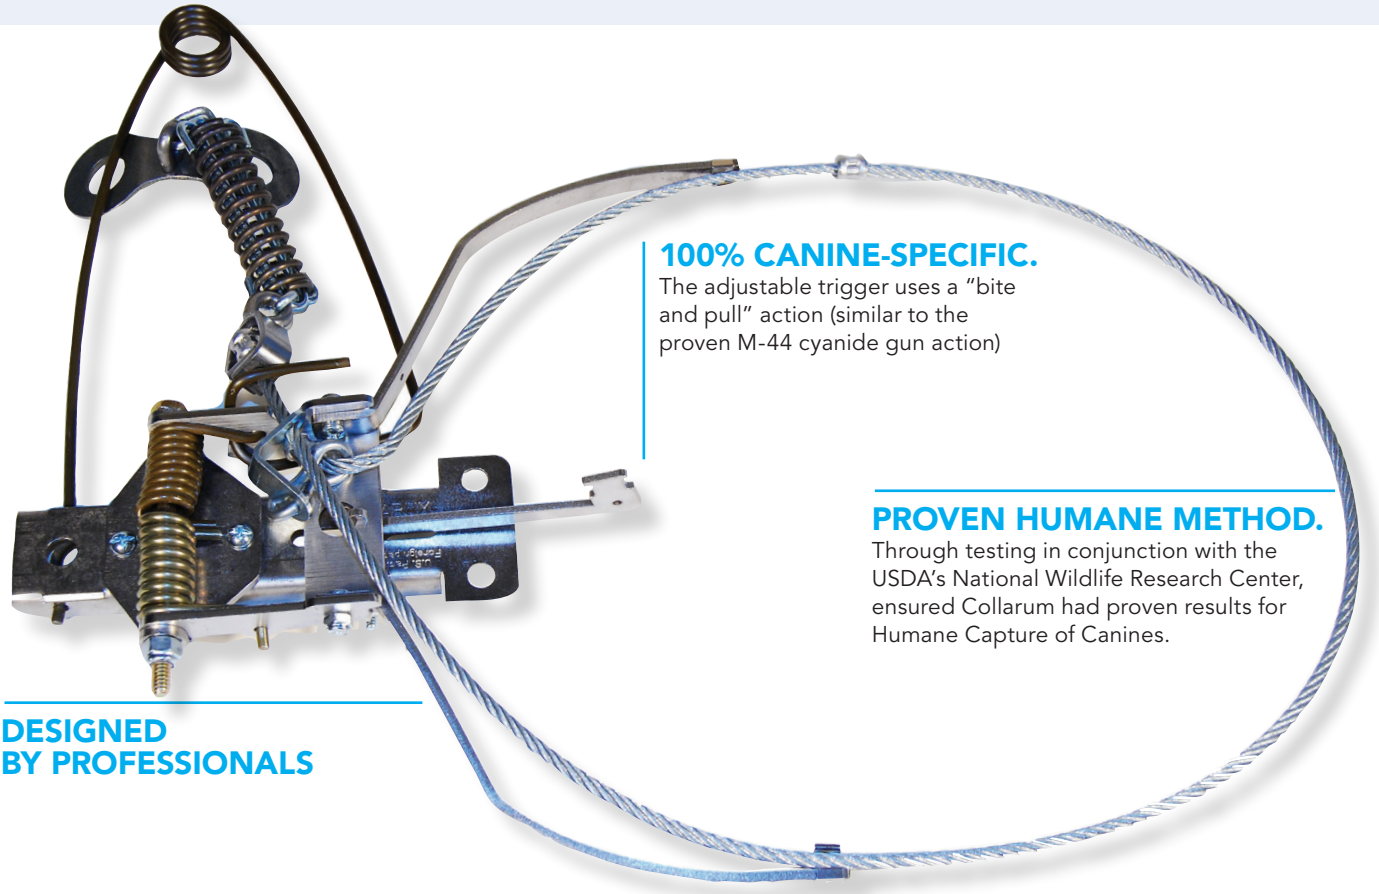

The adjustable trigger uses a "bite and pull" action (similar to the proven M-44 cyanide gun action), not the "push or depress" mechanism employed by conventional traps. Unlike other capture devices, the only animals caught during the Collarum's development and trialing were canines.

PROVEN HUMANE METHOD.

From day one, the Collarum was designed to meet International Humane Standards. Through testing in conjunction with the USDA's National Wildlife Research Center, we've made a number of improvements, including our latest, a Relaxalock cable that ensures even more "dog-friendly" captures when needed.

IDEAL FOR ALL AREAS.

Light, compact and easy to hide, the Collarum poses little risk to humans, livestock and pets—a particular advantage for Animal Control Officers in high traffic and high visibility areas. Since 2002, the Collarum has been proven in urban backyards and landfills, coyote-plagued pastures and remote rural settings worldwide.

100% CANINE-SPECIFIC.

The adjustable trigger uses a "bite and pull" action (similar to the proven M-44 cyanide gun action)

PROVEN HUMANE METHOD.

Through testing in conjunction with the USDA's National Wildlife Research Center, ensured Collarum had proven results for Humane Capture of Canines.

DESIGNED BY PROFESSIONALS

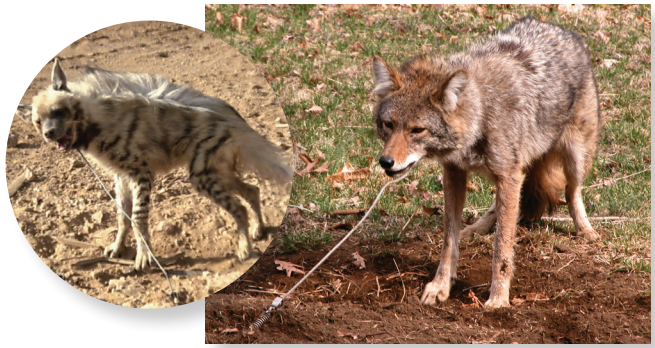

All Collarum models are made of stainless steel and have one of three reusable cable options:

Relaxalock: relaxing lock designed for live capture, specifically for dogs trained to leash, choke chain or collar

Shurlock: non-relaxing lock designed to hold canine with minimal damage

Lethalock: non-relaxing lock designed for quick kill and less fur damage

Each Collarum includes a complete set of assembly and setting instructions plus instructional DVD. If you'd like to see the Collarum at work, visit www.collarum.com

WCS Specialty Live Traps

Collapsible Muskrat Trap

Sometimes called the submarine trap, this multiple catch muskrat colony trap can be submerged in a muskrat's runway or den for effective catching. A passive door on each end allows for entry while a central handle holds it in a rigid square shape. When the handle is removed from the trap, it folds flat for easy carrying and storage. 28"L x 5"W x 5"H trap is made of 1" x 1" galvanized wire mesh. Note: If this trap is located in shallow water it can be used as a live capture device, however locating it in deeper water makes it lethal.

WCSMUSKC $25.25

WCS™ Simple Squirrel Trap

Inexpensive, easy to set and sensitive enough to catch chipmunks. Made in Pennsylvania exclusively for WCS, this 1" x ½" mesh trap comes with a spring-loaded door for quick, secure capture. Dipped in trap dye for rust resistance and ready to go.

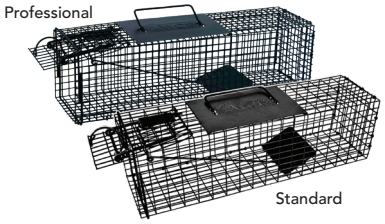

WCSJC001 **$23.25**
Narrow: 3" x 4" x 17"

WCSJC002 **$24.25**
Standard: 4" x 4" x 17"

WCSJC003-XL **$28.25**
Xtra Large: 5" x 5" x 21"

Sized to fit in a gutter and easy to set from a ladder.

WCS™ Special Squirrel Traps

WCS created this easy-to-set squirrel trap to stand up to years of service. Trap measures 5"W x 5"H x 18"L, dimensions precisely suited for squirrels. It is offered it in two styles: Standard with 1" x ½" mesh for general use and Professional with ½" x ½" mesh for daily use and to prevent bait access from the outside of the trap. Both traps include an effective door lock to allow for one hand setting (great for use with ladders). And we added a handguard plate for protection when moving your capture. The result is a custom-designed trap that is second-to-none. A WCS exclusive!

WCS55STD (Standard) **$38.50**
WCS55PRO (Professional) **$44.95**

WCS™ Excluder Series

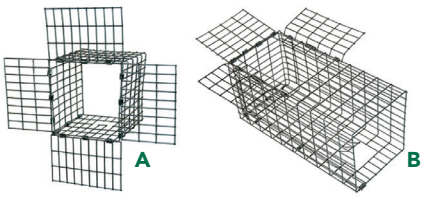

Our new 4" Excluder Series provides great flexibility for excluding squirrels and similar size animals. The trap has a one-way door, mounting flanges and a hinged back door which can be left open to let the animal out or closed if you wish to relocate the trapped animal. Constructed of 1" x ½" Galvanized Wire and includes a handle. When used with the nose cones listed below, the mounting flanges are not used. 3 different type nose cones are available. Secure nose cone over entrance hole of animal. Once an animal is caught, you can replace the trap, leaving the nose cone secured. When all animals have been caught remove nose cone and repair hole.

WCSEXCL-Kit (2) One way door traps & (1) Straight Nose Cone **$74.95**

A Straight Nose Cone - Secures trap perpendicular to structure.

B Wall/Soffit Nose Cone - Secures trap against or under a surface.

WCS™ Floating Muskrat Trap

Works in only a foot of water! Our lightweight, innovative trap has two compartments – one 7" high above water and one 13" below – plus a 7" floating platform outside the trap. The muskrat sits on the platform, smells the bait and enters through the one-way door… trapped, and with plenty of room for the family to join him. For live capture, wire the interior spring loaded door open. 2 clear out doors. Sturdy 1" x 1" galvanized wire mesh. Measures 18L x 16W x 20H.

WCSFMT2 $179.50

No-See 'Um™ Chimney Trap

This is the best trap we've found for coons! The No-See 'Um fits right down the chimney flue, hidden from sight. Raccoons climb up and through the passive door of the trap, triggering a wire and locking the door behind them. A visual indicator allows checking it from the ground. Made of 1"x 1" galvanized mesh for years of service. End doors have sturdy 10.5 gauge ½" x 2" mesh, with flange at bottom. Fits 9 x 13 and 13 x 13 flues.

WCSNOSEE $184.50

WCS™ Special PRO-24, Special PRO-30 and PRO-30 Rear Release

The WCS™ Special PRO Cage Traps were designed by WCS for professionals, meeting our exact specifications. Not available anywhere else, these traps are a special value and have features professionals are looking for in a commercial-grade skunk and raccoonsized trap.

Lower portion and back is constructed of 1/2" x 1" mesh which makes for a very durable trap and prevents animals from pulling up dirt and debris into the trap.

The Special Cage Traps are able to stand up to the rigors of day-to-day use by professionals. They have a simplified locking mechanism and finger grip, allowing you to set the trap or open the door release with one hand. Pan has a beveled back for added strength and is protected by lift guards on either side. Sliding rear door for easy baiting and release of captured animal.

The Coontroller™

An industrial strength exclusion device designed to allow raccoons to leave a structure but not allow them to return through the original access point. Appropriate for use when raccoons are in an attic, chimney or underneath an enclosed shed or deck. The excluder features a unique cam locking double door that allows wildlife to push through to gain access to the outside, but locks behind them so if they try to re-enter, they are stopped cold. The Coontroller is 17" x 8" x 8" and is constructed of 1" x 1" galvanized 14 gauge wire mesh. Also effective for groundhogs, skunks, feral cats, armadillo and other similar sized animals. Note: This is not a trap; it allows animal to leave but not re-enter.

WCS54590 $125.95

WCS Specialty Live Traps (continued)

WCS™ Pigeon Trap (Low Profile)

Perfect for tight spaces (ledges, patios, billboard catwalks – you name it). 2 bobbin-type doors have unique "feet" that prevent jamming and 1" x ½" mesh that prevents hawks from feeding on captured birds. Holds 6-10 birds. 24"L x 12"W x 7"H.

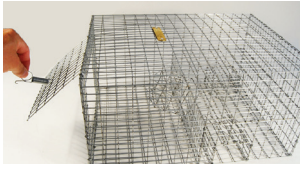

WCSPGLP $57.50

WCS™ Sparrow Sled Live Trap

A unique solution for use in "big box" retailers, factories and hangers. When suspended from rafters, this trap's sled base allows for a landing spot (bait area) and keeps debris from falling on employees and customers. Front entry compartment has funneled door and cone funnel to back compartment, equipped with 2 water bottles for thirsty captured birds. Trap made of 1" x ½" mesh and measures 24"L x 12"W x 12"H. Sled measures 33"L x 13.5" 4"H.

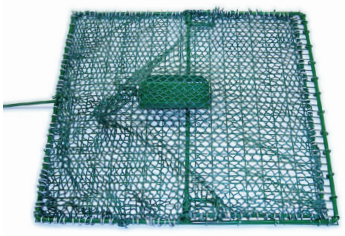

WCSSPWSLDE $143.50

WCS™ Multi-Catch Sparrow Trap

No fuss, no muss, no moving parts. Our super-sturdy Multi-Catch Sparrow Trap has two entry points and a side release door. Just set in an area where sparrows are gathering and bait with seed or breadcrumbs. 8-10 bird capacity. 16"L x 12"W x 8"H.

WCSKBSPWT $56.50

WCS™ "EZ" Catch Bird Trap

Proven to work, easy to use, safe for the birds – that's why we trust our EZ Catch Bird Traps. A spring-loaded gentle nylon net closes like a clamshell over the birds when they trigger the bait pan, to trap them quickly and effectively. The metal mesh base frame is powder coated for rust resistance. Can be mounted on walls, buildings or placed in trees. Base and net are green to blend with surroundings.

WCSRC24 $95.50
24" x 24" x 2.5" – (Crow/Duck/Grackles)

WCSRC36 $159.25
36" x 36" x 2.5" – (Duck/Chicken)

WCS™ Wooden Rabbit Trap

If you've tried to get a rabbit into a wire cage you know it's no picnic. So we offer a unique all-wood, ¾" pine box that makes trapping easier. As the rabbit walks up the incline to the bait, their weight tilts the wooden pan forward and the door closes behind them. We've included 1 oz. of pure Apple Essence as an attractor. 24" x 7" x 8.5"

WCSWRT $59.95
WCSWRT2 with double doors **$69.95**

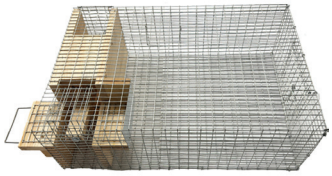

Bobcat Trap

The Bobcat & Grey Fox Trap measures 36"L x 9"W x 18"H and is constructed of 1" x 1" wire mesh which is powder-coated brown for added durability and ease of camouflaging. Trap has a locking guillotine-type gravity door constructed of .25 cold-rolled steel rod. The combination of gravity, coupled with the powder-coating makes this an extremely fast closing and quiet trap door. Triggering pan is solid, there is no walking on wire mesh. The pan at the interior end has approx. 2.5 - 3 lbs. of pan tension and works in a see-saw fashion. When the trap fires the animal is well inside the traps enclosure.

Safeguard Products

Standard Front Release

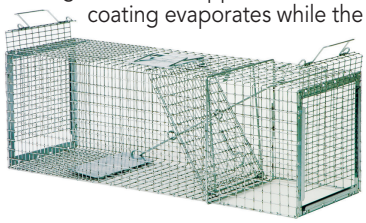

A favorite with Nuisance Wildlife Control Professionals, Animal Control Officers and Government Agencies. Safeguard has been in business since 1982 and offers a wide range of economical and commercial-grade options for professionals. Constructed with patented field-proven Galfan wire mesh that is much more corrosion resistant that galvanized wire. Made in the U.S.

Slide Release

Humane Cage Traps

With the exception of the 18" trap all others are made of Galfan corrosive resistant wire mesh. This revolutionary coating provides up to three times longer life than galvanized-after-weld wire. Before welding, the wire is dipped in an aluminum- zinc bath. During the welding process the zinc in the coating evaporates while the aluminum forms a new protective surface that makes the welded joints extremely resistant to corrosion. Over 24" sizes have 1" x 1" wire at the front and ½" x 1" wire at the rear protect the bait area. Additional features include; support rings on the rod between door and pan, spring loaded doors, hand guard and each is available with either a front release or slide release back door. Solid traps with size flexibility to meet your animal capture needs.

TLT108

Original Series: Rigid Traps with One Trap Door

These professional-grade, heavy-duty traps operate reliably in practically any situation – even upside down! All styles have a fast spring-loaded V door with automatic locking that activates as soon as the animal steps on the rear trip pan. A special locking system and heavy trap door reinforcement stops captures from forcing the door open. Super-tough frame is welded with galvanized steel rods for extra support and endurance, bait areas are welded with galvanized ½" x ½" wire mesh to prevent escape. Adjustable trigger release mechanism allows for heavy or light sets.

Original Series: Rigid Traps with Two Trap Doors

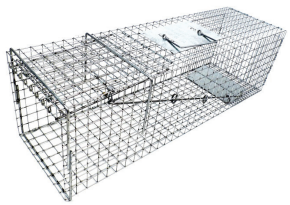

Features the same sturdy frame and construction as Tomahawk's proven single door traps, with an extra door for twice the effectiveness. In their set position, double door traps have no wires or doors to obstruct the animal's view and allow entry from either end, improving capture chances. Trip pan is located in middle of trap and, once activated, shuts and locks both doors. If desired, the Double Door can be set in single door position, making it a versatile option in the field.

Professional Series Traps

Tomahawk Professional Live Traps are the strongest, most durable, and most effective traps available. These traps surpass the legendary Tomahawk "Original Series" traps when it comes to toughness. They feature a very strong frame with tighter mesh and heavier gauge wire. The construction prevents animals from reaching through from the outside to steal bait and also prevents trapped animals from reaching outside to damage surroundings.

One-way Door Excluders

Remove unwanted animals from homes and buildings without trapping! Simply attach the Excluder's 4 moveable wings to the exterior of the building to surround the rodent's access hole. As animal exits, it pushes its way through the one-way spring-loaded automatic door, locking itself out of the building. For trapping and counts, the rear sliding door model is available with extra holding room. Attaches with screws or nails (not included).

Comstock Series Wire Triggered Traps

- ***Super strong coil springs.*** Powerful trap doors instantly snap into place when the trap is triggered. This prevents animals from backing out when the trap fires.
- ***Function In Any Position.*** Can be set standard, upside down, sideways, or vertically. Locking trap doors prevent animals from escaping, even if the trap is flipped upside down.
- ***No Trip Pan To Avoid.*** Trap is triggered by a swing bar push through wire trigger mechanism which allows you to capture the most trap shy animals.
- ***A – E with ½" x 1" 14 gauge wire mesh***
- ***All Comstock Traps are powder coated for increased durability***

Specialty Enclosed Traps

No. 6 Skunk-N-More Trap 6" Trap

Ztraps, "Spray Proof" 6" Skunk Trap is an effective & humane method for capture and release of nuisance skunks. The 6" PVC tube limits the skunk's ability to lift its tail. "If skunk cannot lift its tail, it cannot spray." The enclosed confines of the tube keeps the animal calm and prevents the trapper from being scratched, bitten or sprayed. Effective for catching skunks, opossum, cats, rabbits and other similar sized animals.

ZT6-B $79.95

No. 8 Skunk-N-More 8" Double Door Trap

Constructed of one piece 5/16" PVC tubing it is indestructible and will last for many years. The Nuisance Animal Tube Trap is stronger than any standard nuisance animal cage trap on the market today. Doors are heavy duty, guillotine style, steel. Placed anywhere with our stabilizing system. Solid tube design hides captured animals from view. The enclosed tube will keep animals calm and prevent trappers from being scratched, bitten or sprayed. Includes magnetically attached directional nosecone!

ZT8-DD $138.50

No. 8 Skunk-N-More 8" Trap w/Release Door

The front door is a heavy duty, guillotine style, steel door. The trap can be placed anywhere with our stabilizing system. The rear release door makes baiting, releasing, relocating, and cleaning easy. Solid tube design keeps captured raccoons, skunks and other animals away from the prying eyes of passers by. The enclosed tube will keep animals calm and prevent injury.

ZT8-SD $131.25

Dura-Poly Plastic Catch

Great for trapping skunk or raccoons in attics. This easy-to-set, solid-walled plastic trap with galvanized steel door minimizes the chance of captured wildlife damaging the space outside of the trap by pulling in debris. Made in Canada, each high grade trap is super heavy-duty and comes in white only. Skunk trappers love 'em!

NWS924W $123.25
Skunk 9" x 9" x 24"

NWS1232W $144.50
Raccoon 12" x 12 " x 32"

Tuff Trap -Spray Proof Skunk Trap

6" Diameter PVC x 24"L, with removable back plate

Constructed of round 6" PVC pipe, so when a capture is made the skunk is fully enclosed and out of view. The trap has a gravity-activated door which is very easy to set and a slide back door when release is desired. This trap is very unique as it doesn't look like a "square cage trap" to a trap-shy animal.

NWSTT6 $80.50

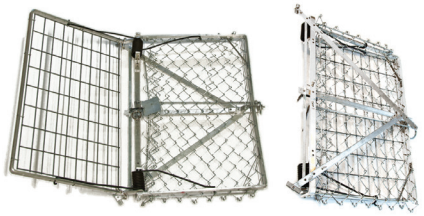

ANSWER Skunk trap by JT Eaton

30" x 7" x 8" rugged polyethylene construction, spring loaded trap door and easy open release door. Low profile to minimize spray, darkened interior keeps animal calm.

Live Beaver Traps

KORO Live Beaver Trap

Shut them up tight. The KORO trap's "clamshell" style construction has been in use since 1932 and enjoys many satisfied customers. Suspended from two metal fence posts, with one closing surface parallel to the bottom, this trap is very adaptable to high and low banks, swift or shallow streams, etc. And because the trap is off the bottom, you don't have to worry about it sinking in the mud. All-aluminum frame will last a lifetime.

NWSKT04 KORO Live Beaver Trap **$538.25**
NWSKT05 Replacement Springs (pair) **$78.50**
NWSKT09 Replacement Chain Link Kit **$76.95**

Comstock Beaver Trap

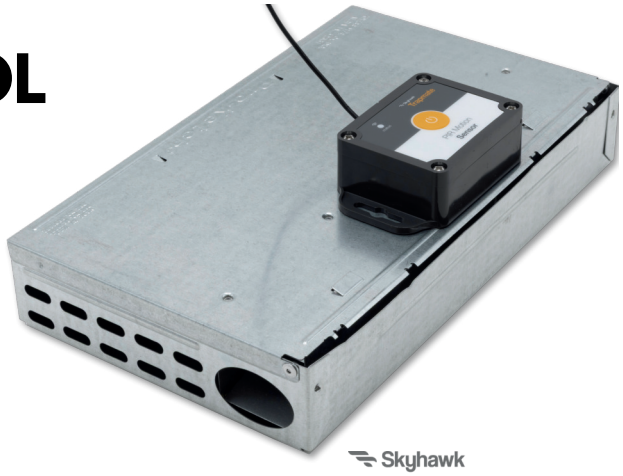

The Comstock Custom Cage Live Beaver Double-Door Trap is one of the most versatile live beaver traps on the market. It can operate on land, in water, or entirely submerged underwater. The CCC Beaver Trap can be set in channels underwater and is fully effective when set both sideways or upside down because of the double spring-loaded doors. The wire trigger eliminates the possibilities of beavers "skipping" over a pan. The trap features a durable construction of 2" x 2" wire with handles for convenience.

Body Grip Traps

In those situations when live capture is not practical, you want products that enable a quick and humane death. Single springs, double springs, unique triggers, square or round, we have the variety and the ideas for effective use.

Safety lever

The **WCS Easy Set Tube Trap**, with a new patented setting system, is extremely easy to set and very effective! Constructed of 21-gauge steel, this tunnel shaped trap is 4.5 inches in diameter, 15 inches long, and is powered by a beefy double torsion spring. Used either baited or non-baited, the tunnel is a natural attractant to squirrel and other rodents wanting to run through it or hide in it.
WTunnel01 $51.25

The **Classic WCS™ Tube Trap** is ARMOR-COATED with an electro-plating process which is olive drab in color and is highly rust resistant so will last for years. No need to dip, dye, or spray paint these traps. Just pull them out of the box and use them. This tunnel shaped trap is a very effective for squirrel and rodents. Constructed of 21-gauge steel, the trap is 4.5 inches in diameter, 15 inches long, and is powered by a beefy double torsion spring.
TUBE001-1 $40.95

The **WCS™ Shorty Tube Trap™** is a shorter version of the classic Rust Resistant Tube Trap, with a few new advantages. Just like its big brother, it is treated with an electro-plating process which is black in color and highly rust resistant. Constructed of 21-gauge steel, the trap is 4.5 inches in diameter, 7.5" inches long, and is powered by a beefy double torsion spring. It offers a zero-clearance strike, and its smaller size allows it to be used in spaces where the larger traps just won't fit.
TUBE002-1 $37.95

Tube Trap Setter – Single Lever

For added leverage when setting your Tube Trap, just slip it onto the strike. Made from durable zinc-plated steel. This setter is most effective when the trap is secured to a structure, allowing you to set the trap with a free hand
TubeSet-A $12.95

WCS Tube Trap Cap

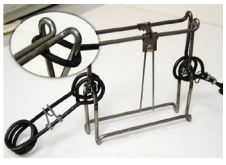

The WCS Tube Trap Cap is just the tool for increasing the versatility of our popular Tube Trap. Available in two styles – with or without an access hole. Choose Model A to close down the opening on the Tube Trap, or Model B to close off one end all together. It mounts easily just by sliding onto the end of the trap. Additionally, with its feet, the Tube Trap Cap serves as a stabilizer with mounting holes allowing the user to easily mount on a variety of surfaces.

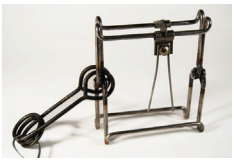

TTC-A-1 WCS™ Tube Trap Cap with Access Hole **$8.25**
TTC-B-1 WCS™ Tube Trap Cap Solid **$8.25**
TTC-3PK WCS™ Tube Trap Cap 3-PACK (2 with access holes & 1 solid) **$22.25**

TRAP HARDWARE

Body Grip Accessories (Triggers, Brackets, Add-ons)

Bolt-On Body Grip Replacement Triggers

Bolt-on body grip replacement triggers are easy to install and they work on all brands of body grip traps.

WCSBO110	#110/#120	$1.25/ea.	$12.95/doz.
WCSBO160	#160/#220	$1.25/ea.	$12.95/doz.
WCSBO220	#220	$1.25/ea.	$12.95/doz.
WCSBO330	#330	$1.95/ea.	$17.50/doz.

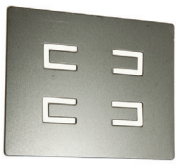

Hardwood Body Grip Pans

Minimize body grip trap avoidance. Slide the trigger wire through the pre-drilled holes in the hardwood pan, bend the trigger wire over to hold the pan on and you're ready to set the trap. Works on all sized body grip traps (#110/#120 may require sanding)

WCSHWP110	#110/#120	$2.50/ea.	$25.75/doz.
WCSHWP160	#160/#220	$2.75/ea.	$26.75/doz.

Barker's BG Pans

BG Pans are very effective and very easy to install. Simply bend the trigger wires over and clip the pan on. There are no trigger wires hanging down to cause the animal to shy away.

WCSBCP-1	#110/#120	$11.95/doz.
WCSBCP-2	#160/#220	$11.95/doz.

Beaver Bait Trigger

Forget wiring bait bundles and positioning bait – this new and improve trigger helps you quickly, easily and SAFELY make a bait set. Simply "screw" a piece of bait (poplar) onto the trigger or clip and let the jaws of your body grip trap hold the Beaver Bait Trigger in position, forming a friction fit. When the animals attempts to take the bait from either direction, the trap fires. And a nickel-plated ring holds the trigger onto your trap so you'll never lose it.

WCSRC008 Pack of 6 $10.25

Sullivan's Circle Triggers

These triggers help reduce "trigger avoidance" frequently encountered with regular V shaped triggers. The round opening provides an attractive pathway for the target animal. They are made of heavier gauge wire to resist bending. Each trigger comes complete with a two-piece bracket and bolts for quick and easy installation on your body grip traps.

NWSSCT-110 $1.25/ea. $12.95/doz.

"ELIMINATOR" Body grip Triggers

Comes with a bolt-on assembly that is tension adjustable. Trigger wires are stainless steel which makes them impervious to acidic and salt water and are plated for added protection and camouflage purposes. These trigger wires can be bent and straightened numerous times without breaking. The #220 Eliminator model has 6" trigger wires. The #330 Eliminator model has 8 1/2" trigger wires – longer than most replacement triggers currently on the market.

ELIM220	#220	$2.75/ea.	$25.25/doz.
ELIM330	#330	$3.25/ea.	$30.75/doz.

"Bulls-Eye" Triggers

Bulls-Eye Replacement Triggers are made of heavy duty stainless wire (.104) and complete with the hardware to replace your stock trigger. These stainless trigger wires are factory plated for added protection and camouflage. Will withstand years of use without breaking. The #220 Bulls-Eye "circle" has a diameter of 4.5", and the #330/#280 has a diameter of 6.5".

WCSBET220	#220	$2.95/ea.	$28.25/doz.
WCSBET330	#330/#280	$3.25/ea.	$30.75/doz.

MB Body Grip Combo Triggers

Combo triggers come with an extra heavy duty one-piece crimp-on bracket with one hole in the center. You can use either a rivet or a bolt and nut, both of which are included.

WCSMB110	#110/#120	$1.25/ea.	$12.25/doz.
WCSMB220	#220	$1.25/ea.	$12.95/doz.
WCSMB330	#330	$1.95/ea.	$18.95/doz.

Oneida Victor Conibear® 4-Way Replacement Triggers

WCS4W110	#50/#60/#110/#120	$1.50/ea.
WCS4W160	#160	$1.50/ea.
WCS4W220	#220/#280	$1.75/ea.
WCS4W330	#330	$1.75/ea.

Barker's BG-Mount Brackets

These brackets are used to hold body grip traps of all types. They're made of formed steel and have three holes located in the center to allow fast, easy fastening to any wood surface.

Code	Style	Traps	Price	
			Each	Dozen

Trap Safeties

Ram Lok Plus Safety

Built tough by RAM in Canada. This spring-loaded safety lock for body gripping traps works on all sizes of traps and is very easy to position over the top of the jaws. When the trap is placed in position, the last thing you do is compress the spring of the safety device and remove the lock off the top of the trap. Your hands are never in danger of the trap inadvertently closing on them. A safety device is STRONGLY recommended for anyone handling body grip traps.

Bear Foot Snares

WCS™ PRO-12 Bear Foot Snare

The PRO-12 has become the standard among bear trappers, either for nuisance or sport trapping. The pan has been "right sized" in response to bear trappers feedback and is fully tension adjustable. A 12" launcher with specially shaped jaws, holds and propels the spring enhanced cable onto the bears paw. Jaws can be easily replaced if needed. The 3/16" 7 x 19 cable has a custom stainless Tripp lock and a 40" compression spring running the length of the cable. The spring eliminates the need for movement of the bear to close the cable loop. Each cable comes with a heavy-duty stainless swivel.

WCS™ Bear Foot Snare (Aldrich Style)

Due to popular demand, this Aldrich type bear foot snare is back in production. Used extensively by the USDA-WS and state wildlife agency personnel, the improved Aldrich now has a safety latch to prevent premature triggering. When properly set, non-target animals can be released and captured bears can be tranquilized, released or relocated. Made exclusively in the U.S.A. for WCS.

WCSABS $60.50

WCS™ Grizzly Bear Foot Snare Kit (Aldrich Type)

Used extensively by USDA-APHIS-ADC and state wildlife agency personnel to catch problem bears. This method is safe, when correctly used, and allows for the release of nontarget animals. Made in the USA, the kit includes:

- Spring snare thrower
- A 48" 3/16" cable with a bear lock and solid loop end
- A 5' 3/16" galvanized aircraft extension cable with loops at each end
- An 8 mm, heavy duty (1,400 lb. working load limit), stainless steel swivel with "clevis style" ends

WCSABSGRIZ-KIT1 $98.50

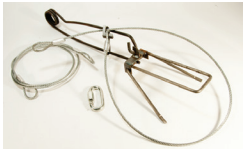

Crit-R-Done® Bear Foot Snare Kit

Kit includes the Crit-R-Done cylinder, a bait bag, zip-ties, two bullet anchors with swivels, cable stop, snare cable with compression spring and cable clamp for spring. The bear simply reaches into the cylinder to grab the bait bag positioned at the bottom of the cylinder, and by pulling up on the bait "pushes" the cable snare loop onto its' leg, resulting in a positive capture.

CRITRDONE-KIT $404.95

Fremont Bear Foot Snare

The Fremont Bear Foot Snare, which comes complete with the spring-loaded throwing mechanism, one (1) bear foot snare cable, one (1) 5 ft. high tie cable for anchoring the snare cable, and one (1) Stainless Steel swivel for easily detaching and replacing the snare cable after a capture is made.

WHFRBEFO $56.50

M15 Bear Foot Snare

Versatile, easy to bait and incredibly effective! To set, mount the M15 to a 5-gallon bucket (not included) with the spring-activated cable loop nestled inside the bucket lid. A bear reaching into the bucket to pull on the bait hook is immediately snared by the paw. The deer proof M15 comes with complete instructions, M15 Thrower, Snare cable loop, Heavy Duty Cable Anchor, and a Stainless Steel #8 Swivel.
